It's FESPA time!

Michael Althoff | CEO
Yellotools

Dear customers and friends of Yellotools,

I am absolutely delighted that we can all come together again at a trade show like before the pandemic. But even after Corona, there are problems in the world that we all have to face. The extremely increased prices of the important raw materials for our production and the tense global political situation require us to focus on the essentials and act decisively. We accept these new challenges: We pursue our goals with fighting spirit and passion, to provide you with the best tools for moving to the next level. Because your success is our reward, and the only way OUT is FORWARDS!!!

That's why we're focusing on growth in all areas! We have recently enlarged our machine park and, with a lot of passion, further expanded our headquarters in beautiful Windeck county. And we have also been able to add more Yello's to our family. Among other things, our new colleagues are helping us to advance in video production - we are already curious to see how you like the new content! So no expense or effort has been spared to make our LEAN manufactory even more efficient and productive.

My great team has really worked hard on new innovations for you over the winter 😊 We are grateful for your brilliant ideas, which we have made possible for all the professionals out there. YOU GUYS ARE SIMPLY THE BEST!!!

We hope that our latest creations will make you happy and make your work EASIER AND FASTER. It's not for nothing that we are the best partner when it comes to tools Made in Germany for sign-makers and car wrappers 😊

Unfortunately, success also leads to envy - The phrase "Often copied - never equalled" applies to us just as it does to other market leaders. But only where Yellotools is written on it, there is Yellotools in it!

**We don't IMMITATE,
we INNOVATE!**

Rock on 🙌

Yours Michel

New tools for 2023

Yellotools is always looking for the best tools for signmaking and car wrapping, and we are often inspired by our customers to develop new products. Of course, we made this our task again this year and created some exciting new tools and accessories for you.

Once again, we have dealt with the topic of film roll storage and handling and created a new product family: The lifting hook **TimStick** in combination with the new **Twister Slot** is the perfect solution for back-friendly handling of film rolls.

If you prefer to store rolls of film horizontally, the **Treemaxx Flexi** is just the thing: the mobile film rack is designed so that the 16 roll carriers can be adapted for different material widths from 100 to 160 cm.

For storing sheet material for sign making, we offer the height-adjustable **YelloSheetSlider** sheet storage system. If required, it can also be extended in length with additional elements.

From now on, it will be much easier for car wrappers to position the film precisely when applying it in the mid-section. With the **FloMeter** we present the ultimate all-in-one solution of tape measures: Four different scales make

it possible to determine the centre point quickly and without a lot of calculations.

We wouldn't be Yellotools if we couldn't also introduce a couple of new squeegees. The multi-purpose squeegee **ProWrap 360** is a real all-rounder with numerous application possibilities. Trying it out is clearly more important than studying it - just take the tool in your hands and discover its literal "versatility"!

With the **WrapDragon**, we are once again setting the standard among 4" squeegees: A new manufacturing process allows a burr-free use of the whole tool. As usual, the ergonomically shaped squeegee is available in different hardnesses and can be used with Yello-Wings 4" squeegee pads.

Discover more new products in this brochure and over 500 tools and accessories in our webshop.

Have fun!

Let the dragon fly!

The new 4" squeegee for vinyl application on vehicles and in the signmaking industry

We proudly present the latest member of the Yellotools squeegee family: the **WrapDragon**!

This wrapping dragon really has it all: Thanks to the notches in the two short flanks of the squeegee, you can now get on much better with wrapping work in recesses and obstructed angles and can apply the film perfectly.

In addition, the four outer flanks cushion the contact pressure of the corners in a completely different way to conventionally shaped squeegees.

The WrapDragon features three R4 radii and a 90° edge at the corners. This was requested by our beta testers, who particularly liked the squared off corner for applying vinyls under mouldings and edges. Even deliberate cutting of the film is possible with this edge.

A new manufacturing process makes the asymmetrical corner arrangement possible and allows the whole tool to be used without residual plastic burrs.

WrapDragon, of course, is available in the typical Yellotools colours and the corresponding degrees of hardness - from very soft to extremely hard, Teflon-coated or anti-static. The WrapDragon, like our other plastic squeegees and WrapSticks, is manufactured with high-quality, non-carcinogenic plastics in our in-house injection moulding department, so you can also "park" this new tool in your mouth without hesitation :)

from **2,61 €**
+ VAT and shipping

Product features:

- ergonomic plastic squeegee for vinyl application
- 3x R4 radius and 1x 90° edge
- central recess for improved handling (center finder)
- 7 different degrees of Shore hardness

Shore hardness:

- Green (40 Shore D): very soft and flexible
- Blue (62 Shore D): rather soft, inexpensive
- Antistatic (70 Shore D): medium soft, antistatic material
- Gold (72 Shore D): medium soft
- Pink (72 Shore D): medium soft
- Orange (82 Shore D): rather hard
- Teflon (89 Shore D): very hard, refined with Teflon technology
- Peekaboo (93 Shore D): hard, trendy smoked glass look

PROBASIC

The classic 4" Squeegee

- central recess for improved handling (center finder)
- different radii at the squeegee corners
- 8 different degrees of Shore hardness
- 3 material types

PROWRAP

The versatile trapezoidal squeegee

- "Center finder" to find the center of the squeegee without looking.
- Improved, recessed grip
- different corner radii
- a hole for accessories such as the EasyCord

PROWRAP DUO

Two different squeegee sizes in one tool

- improved grip recess
- central recess for optimal handling (center finder)
- different corner radii for applications in beads and crevices
- two holes for accessories

WRAPSLIPCUT MAGICMASTER

Teflon squeegee with parallel slots for exact distance cuts

An extremely slidable Teflon squeegee with parallel slots through which the blade is guided with exact spacing during cutting. This makes it possible to create a clean film cut on vehicle edges and windows in no time.

WRAPSLIPCUT CLIPPER

Cut car wrapping films precisely

- handy knife guide with spacer
- ergonomic shape
- foldable front part

WRAPSLIPCUT MINI

Cutting aid for car wrapping

With the WrapSlipCut Mini, cutting the film in parallel is convenient and easy: The integrated slots serve as a knife guide and also as a spacer - so the distance to the window frame always remains constant!

WrapDragon SlipCut

Teflon squeegee with blade guidance slots for precise distance cuts

**R4 radius with parallel slots
2 mm spacing**

**90° edge with parallel slots
2 mm spacing**

With the **WrapDragon SlipCut**, we expand our series of edge cutting aids for all types of film applications. This combination of the WrapDragon plastic squeegee and the parallel slots of the WrapSlipCuts for precise blade guidance is ideal for clean edge cuts.

The 90° edge of the WrapDragon makes it possible to align a horizontal or vertical cut exactly in the corner of a window frame and then perform it using the SlipCut method: The cutting aid is moved parallel with the blade and guarantees a perfect cut at a constant distance from the inner window edge.

The low-friction Teflon material of the WrapDragon SlipCut prevents skidding on all surfaces.

In addition to large-area applications with window, mirror or decorative films, the WrapDragon SlipCut is also perfect for use with window tinting and car wrapping films, as well as with plotter and furniture wrapping films.

12,90 €

+ VAT and shipping

Product features:

- plastic squeegee with integrated blade guidance
- blade guide also serves as a spacer
- different cutting distances are possible
- Teflon material with excellent gliding properties
- 3x R4 radius and 1x 90° edge
- ergonomic shape

YelloWings Plek Teflon

Self-adhesive Teflon pads

YelloWings Plek Teflon glide perfectly over film materials of all kinds - try it yourself!

Product features:

- self-adhesive squeegee pad
- material: teflon-coated fabric improves the gliding properties
- packaging unit: pack of 5

ProBasic

A synthetic product for the future: no silicone, no petroleum, no CO2!

The **ProBasic ZERO**'s material consists of 100% bio-based components, 30% of which are obtained from renewable raw materials such as sugar cane and cellulose. Thanks to this innovative mixture of materials, the ProBasic ZERO offers unique properties: it is industrially compostable and also burns CO2-free, as the material contains no petroleum or silicone. In addition, the material complies with the European REACH regulation and is food-safe; it also meets the requirements of the American FDA*.

Of course, the ProBasic ZERO squeegee can be used without any restrictions for applications in sign making and car wrapping. With

a comfortable Shore hardness of 60°, it is flexible enough for car wrap jobs. Due to the established side length of 4", all YelloWings squeegee pads can be used with this format.

With the ProBasic ZERO, we are setting an example as a manufacturer for more environmental awareness - would you as customers like to support us in spreading this message in the signmaking industry? The ProBasic ZERO is also an excellent marketing tool to get the message of more sustainability out to your customers!

5,99 €

+ VAT and shipping

Product features:

- plastic squeegee made from organic materials
- food safe / BPA and phthalate free
- complies with the European Toy Directive (safe for children)
- 100% REACH & FDA compliant material
- 100% industrially compostable
- 100% CO2-neutral combustion
- 100% closed CO2 cycle
- ZERO petroleum-based substances
- ZERO residues
- ZERO microplastics
- Made in Germany

*The product is suitable for contact with all foods that meet FDA food types I to IX (except infant formula, breast milk and foods containing alcohol) and meets FDA use criteria C to G.

YELLOWINGS MICROFINE

Microfiber squeegee pads

- especially good for very sensitive surfaces
- available in 5 sizes
- SlimSkin and BigBuffer

YELLOWINGS FELT

Felt squeegee pads

- for coarse-pored surfaces such as FOREX
- available in 3 sizes

YELLOWINGS POLY

Polyester squeegee pad

- elastic polymer
- extremely durable
- protects reliably against scratches
- available in 7 sizes
- SlimSkin and BigBuffer

YELLOWINGS MICRO

Soft squeegee pads

- Alcantara-like material
- optimal scratch protection
- excellent gliding properties
- available in 5 sizes

YEL-LO PLEK

The plektrum squeegee for vinyl applications

- ergonomic shape with CenterFinder
- designed by Rainer Lorz
- four different Shore grades
- fitting squeegee pads with polyfibre or Teflon-coated material

YELLOWIN

Squeegee system with interchangeable squeegee lips in various degrees of hardness

- individually combinable squeegee system
- ergonomic handle
- can be used on both sides
- hardness grades from 35 to 93 Shore D

PROWRAP BETTY

The new plastic squeegee for perfect car wrapping results

Safe and fast squeegeeing for any partial or full application thanks to its special 30° shape.

ProWrap 360

Our customer Michel Wülpern of Folientechnik Rotenburg asked us to realize his "dream squeegee". The arguments for this innovative new application tool convinced us:

1. In addition to the "standard", 76 mm long application surfaces which ensure the usual way of working, special features are the perfect haptics of the handy shape and the different side parts. Thanks to a new injection molding method, this squeegee is completely usable all around - hence the name 360!

2. The left side allows not only a permanent 30° work angle to the film as with our popular ProWrap Betty squeegee - due to the flattening of the squeegee lip, it is now also possible to transfer the entire squeegee surface with uniform contact pressure to the entire contour. This feature allows the film to be applied deeply behind sealing rubbers or headlight housings.

3. The right side is rounded at the top and bottom to the application blade flank to

guarantee a smooth transition during the spreading motion and no damage to the surface (film or object).

4. The rounded and flattened tip of the right side allows the lifting of rubber seals before or during the application and is perfect for applying films into joints and beads in one motion. Here, too, the 30° angle ensures crease-free results.

The rounded overall shape also prevents annoying puncturing and scratching of the tool in your pockets. It comes with the typical Yellotools grip surfaces (5) and features the practical center finder (6) for quick positioning of the squeegee in the palm of your hand.

5,29 €

+ VAT and shipping

Shore hardness:

- Green (40 Shore D): very soft and flexible; for curved, round parts such as fenders, mirror caps, helmets, etc.
- Gold (72 Shore D): medium soft; the classic option for all sign making applications

- Teflon (89 Shore D): very hard, refined with Teflon technology; high gliding properties; for use on seals and window frames (cutting and squeegeeing)

WetMaxx

Perfectly apply films on glass panes and vehicle windows

The new **WetMaxx** squeegee system makes wet application of window films, tinting films and decorative films easier than ever: The squeegee blade, specially developed for flat glass applications, glides smoothly over the film and expels the application fluid without leaving any air pockets. Be it UV protection films on office windows, decorative films on partitions in the restrooms or window tinting films on rear and side car windows - Yellotools WetMaxx is the ideal tool for professional applications in signmaking and car wrapping! The squeegee blade is available in two degrees of hardness and three shape variants: the orange version with 90° shore is perfect for applications on curved vehicle windows, the white variant (95° shore) is designed for flat glass surfaces such as shop windows and glass facades. In addition to the rectangular version with a width of 130 mm (only in 90° shore), we offer two trapezoidal versions with widths of 130 and 160 mm and 15° of edge angle, each available with 90° and 95° shore.

Two sturdy aluminum retaining plates hold the WetMaxx squeegee blade securely in their center, and the ergonomic handle is equipped with a non-slip, skin-friendly material. The tilt angle of the squeegee blade is continuously adjustable. To do this, simply loosen the holding screws, adjust the angle and then re-tighten the screws. To protect the film material from scratches, we have covered the lower holding plate with our proven microfibre fabric. This patch is pre-assembled and can be reordered individually.

Depending on the job, the WetMaxx can be quickly modified, for example by replacing the squeegee blade or mounting the additional handle for more contact pressure. WetMaxx is a tool with lots of potential uses and can easily replace many other application tools in your tool bag!

All components of the WetMaxx squeegee system are available individually: From the squeegee blade to the handle to the extra grip handle, you can assemble your WetMaxx individually. As a standard recommendation, we offer the handle together with the different squeegee blades in pairs.

from **89,99 €**
+ VAT and shipping

Product features:

- Heavy-duty squeegee system for wet applications on glass surfaces
- Two degrees of hardness available: 90° and 95° Shore
- Three shape variants:
 - 130 mm rectangle
 - 130 mm trapezoid
 - 160 mm trapezoid
- Squeegee blade dimensions (W x L x H): 130 x 50 x 6 mm (S / T / TH 130) resp. 160 x 50 x 6 mm (T / TH 160)
- Ergonomic, non-slip aluminum handle
- Infinitely adjustable angle of inclination
- Microfiber cover for scratch-free application
- Additional handle for more contact pressure during application

PPF SANDWICH

Sandwich squeegee for applying paint protection and window tinting films

The Yellotools PPF Sandwich is stable enough to exert optimum pressure on the squeegee edge. The pointed edge geometry enables optimal working out of the application liquid up to the film edges. Our PPF Sandwich squeegee is available in two widths: 10 x 7 cm and 12.5 x 7 cm.

Z-STICK

Mini squeegees for PPF applications

With the Z-Stick PPF installations succeed perfectly even in difficult places.

BUMPERRACER

Mark PPF film overhangs for exact fits

With the help of the Bumper-Racer, the application area can be marked on a transfer or stencil film in just a few minutes: Simply select the appropriate racer and mark the desired dimensions with a pen.

WRAPSTICKS

Magnetic squeegee pens for detail vinyl applications

Yellotools WrapSticks are available in 7 shape variants and 5 different materials. The different shapes are suitable for applications on rubber seals, beadings and other recesses or for working on door handles, headlight housings, parking sensors, etc. Depending on the plastic material used, the Green, Gold, Orange, Peekaboo and Teflon variants offer different bending strengths and gliding properties.

WrapStick Flex**WrapStick Carson****WrapStick Betty****WrapStick Hook****WrapStick HangLoose****WrapStick Sloan****WrapStick Tupp****WrapStick Beavertail**

WrapSticks ECO

Now also available as lightweight Eco variant!

Yellotools WrapSticks are custom-designed for detail work in car wrapping. These specially shaped squeegee sticks are used to apply car wrap vinyls in hard-to-reach spots on the vehicle, such as body gaps, rubber seals and recessed parts like headlight housings.

With the **WrapStick Eco** series, we additionally offer a "slimmed-down" product line, which, unlike the regular WrapSticks, are delivered without integrated holding magnets. This not only reduces the weight of the squeegees, but also the price

Everything else remains unchanged: the 7 variants of the WrapSticks Eco, with 5 degrees of hardness and 13 different tool tips, are the first choice for any detail application in car wrapping!

**9,99 €**

Selection options:

- WrapStick Eco Betty Gold / Green
- WrapStick Eco Carson Gold / Teflon / Peekaboo
- WrapStick Eco Flex Gold / Orange / Teflon
- WrapStick Eco HangLoose
- WrapStick Eco Hook
- WrapStick Eco Sloan Gold / Teflon / Peekaboo
- WrapStick Eco Tupp Gold / Teflon

BodyGuard Knife *EVO*

Specialty knife with Teflon coating for push and pull cuts

BODYGUARD KNIFE TEFLON

Backing paper cutter with Teflon glide base

- top sheet and vinyl cutter for clean & safe cuts
- glide base with high-quality Teflon coating
- excellent gliding properties
- steel replacement blades, optionally with titanium coating

BODYGUARD KNIFE TWIN

Dual-bladed vinyl film cutting knife

- backing paper cutter for center strip cuts
- excellent gliding properties
- glide base with high-quality Teflon foil
- steel replacement blades, optionally with titanium coating

BODYGUARD KNIFE DUO HD

Backing paper and vinyl cutter with large handle

- vinyl film cutter for clean & safe cuts
- excellent gliding properties
- large handle for optimal handling
- configurable for pull or push cuts
- cutter base with high-quality Teflon foil
- optional Teflon slide base (can be ordered separately)
- steel replacement blades, optionally with titanium coating

It's time for another evolutionary step in the Yellotools range: we are constantly optimising our tools and trying to combine the functions of different products in a useful way.

With the new **BodyGuardKnife EVO**, you get the best features of the BodyGuard-Knife series along with some new options. The BodyGuardKnife Teflon contributed the Teflon-coated cutter base: It offers optimal gliding properties and guarantees a clean and safe cut, protecting the film and the substrate. Self-adhesive films, silicone liners and backing papers can be cut together or separately. In addition, the BodyGuardKnife EVO features the switch function of the LongReach Duo: if

required, the cutting direction can be changed from pull to push cut. To do this, simply loosen the knurled screw, turn the cutting head around and fasten it again with the screw.

At the suggestion of our friend Rainer Lorz, we developed another practical detail for the BodyGuardKnife EVO: The catch hook integrated in the new handle design keeps the knife always ready to hand in your pocket.

And for the well-deserved after-work drink, there's a bottle opener at the end of the handle - an evolution which we think is perfect!

Push cut

Pull cut

41,71 €

+ VAT and shipping

Product features:

- specialty cutter for vinyl films, liners and backing papers
- can be used for pull and push cuts
- glide base with high-quality Teflon coating
- excellent gliding properties
- catch hook for handy storage
- integrated bottle opener
- steel replacement blades, optionally available with titanium coating

APE FOAMPOTION - 1 LITRE**PPF application foam**

1 litre of APE FoamPotion will produce around 20 liters of application foam. The practical dosing aid in the 1 litre bottle saves you any fiddling with measuring cups: Simply open the second lid in the dosing bottle and press the bottle slightly until the small container (50 ml) has filled up. Add this to 1 litre of distilled water, and the FoamPotion is ready for the next application.

APE APPLEPOTION - 1 LITRE**PPF application fluid**

Wrapping expert Rainer Lorz also uses the ApplePotion for perfect pre-cleaning and post-cleaning due to its outstanding features. For this purpose, he recommends adding one dosage unit (50 ml) to 10 liters of water - this way you get a fantastic surface cleaner.

10 litre canister

APE FoamPotion & APE ApplePotion - Our application fluids now also available in the practical 10 litre canister. Easy dosage, high effectiveness, low consumption!

For optimal PPF installation, an application liquid that meets with the special properties of these films should be used.

The 10 litre canister is the perfect choice for recurring applications: Compared to the purchase of ten 1-litre bottles, you save more than 16% !

Yellotools **APE ApplePotion** allows the film to glide perfectly and to adhere by applying pressure. The film can be removed after a short time without any problems, making any corrections and changes easy.

Due to the basic properties of this potion, the adhesive of the protection film is not attacked and the film receives the desired glossy finish. The Low Cloud technology also prevents the adhesive from forming clouds or becoming milky through the transparent film. The APE ApplePotion of course is fully biodegradable, skin-friendly, clinically tested and pH-neutral.

As an alternative to conventional application fluids, we offer the **APE FoamPotion**, a pH-neutral foam specially developed for the application of paint protection films. The advantages of APE FoamPotion:

- lasts longer than any regular application liquid
- creates a "distance" between the film and the substrate
- makes it easily visible where the squeegee has already been used
- quick adhesion after squeegeeing
- does not contain alcohol and is therefore not aggressive to the film's adhesive
- can be easily washed out

SCAN & WATCH
VIDEO

from **174,90 €**
+ VAT and shipping

Product features:

- APE FoamPotion: Application foam for paint protection films
- APE ApplePotion: Application fluid for paint protection films
- 1 litre bottle with dosage aid
- 10 litre canister for use with dosing pump (sold separately)

- excellent yield: 1 litre of APE ApplePotion equals 20 litres of application fluid
- completely biodegradable
- skin-friendly
- clinically tested
- pH-neutral

APE Duo Red & Green

PPF squeegee in two degrees of hardness for window tinting films and paint protection films

Rainer Lorz of FinestMedia wanted a squeegee for wet applications with the size and shape of the popular ProWrap trapezoidal squeegee. We were happy to comply with this request:

Due to the familiar shape, this squeegee lies perfectly in the hand, you feel immediately comfortable with it. The two-layer structure provides stability and flexibility at the same time.

The DuoGreen is the harder and the DuoRed the softer version of this professional squeegee.

Different edge grinds of 30, 45 and 90 degrees allow different pressure to be applied during squeegeeing.

When applying window tinting films, the liquid is optimally worked out of the film, and the pressure can be increased by simply turning the squeegee.

14,57 €

+ VAT and shipping

Dosing pump 10 ml

for APE ApplePotion and APE FoamPotion 10 l canisters

With this pump you can easily and cleanly dose the exact amount of APE ApplePotion or APE FoamPotion from the 10 litre canister. Each cycle moves 10 ml of liquid.

The dosing pump is simply screwed onto the canister and seals tightly.

18,00 €

+ VAT and shipping

Product features:

- for use with PPF application fluids in 10 litre canisters
- stable and durable design
- 10 ml capacity
- reusable
- suitable for DIN 45 thread

EASYPUMP FOAM

Pressure spray bottle with adjustable spray nozzle

To obtain a uniform foam pattern when using APE FoamPotion PPF application foam, we recommend the EasyPump Foam pump spray bottle with its special nozzle.

The capacity of the bottle is 1.5 liters, and the Ergo Grip allows for fatigue-free working.

EASYPUMP

Spray bottle for application fluid and surface cleaner

For optimal distribution of these fluids, we offer the professional EasyPump pressure pump sprayer. With this pump spray bottle, its special seals also withstand most alcohol cleaners such as YelloJack.

The spray pattern is designed to meet the challenges of all types of film applications: Simply prime the pump a few times to create a durable spray and then go for it!

MAGTAPE RULER POWER

Reinforced magnetic ruler
with measuring scale

- extreme adhesive force on non-magnetic surfaces
- 1 mm thick sheet
- 3 times traction force
- available in 3 lengths

WINDOW WIZARD

Adhesive ruler for window
filming

Thanks to our innovative X-treme Mat, the ruler sticks to the inside of the window and allows you to read the scale from the outside AND align and apply adhesive films accordingly. Available in three different lengths.

YELLOMETER

Measuring tape with
innovative scale system

- Available in these variants Flex, White, Mag, Gecko and Clear.

Three different scales:

- "S" - "normal" scale with the zero at the left end
- "CZ" - "CenterZero" scale with zero in the middle of the scale
- "MF" - scale with red and blue number below the black one, which shows the measured value divided by two

FloMeter

A tape measure for all your needs: Measuring and aligning made easy!

The idea for the FloMeter came from our long-time friend and customer Florian Knirsch, who offers a wide range of vinyl applications with his company Knirsch Beschriftungen.

The FloMeter combines the scales of our YelloMeter product family on a single measuring tape. The multi-coloured print makes it easy to distinguish between the "regular" scale, the center finder function and the two scales for half values. This tape measure is perfect for accurately positioning graphics on vehicles and shop windows. If, for example, a car wrap vinyl has to run along the center of an engine cover, the total width of the panel is first measured with the top scale of the FloMeter.

Then you can read off half the value on the orange scale. The tape measure is then repositioned at half the width using the lower scale (center finder). The red arrow now indicates the exact center of the panel and makes it easier to align the film.

The different scales of the FloMeter in over-view:

- "regular" scale (top) with the zero at the left end
- "CenterZero" scale (bottom) with the zero in the middle of the scale and clearly visible indicator arrow
- "MF" scale with orange (half measured value) and blue (half intermediate value) digits

The FloMeter is made of high-quality polystyrene with multi-coloured printing. We currently offer the Plain and Gecko versions in lengths of 60 and 195 cm. The Gecko version features the Yello-tools X-treme Mat on its back: with these adhesive mats, the tape measure sticks to smooth materials such as glass and metal - ideal for vertical film applications on shop windows and glass façades!

from **18,00 €**
+ VAT & shipping

Product features:

- measuring tape with multiple scales
- easy measuring and reading
- regular scale, starting from 0
- half-value scale (orange)
- intermediate half-value scale (blue)
- center finder with indicator arrow
- material: Polystyrene, optionally fitted with X-treme Mat
- two lengths: 60 and 195 cm

YelloKNOX Mag

Magnetic holder for car wrapping heat guns

Many of our customers already use the magnetic WrapGun Mag heat gun holder for STEINEL heat guns when pre-heating and re-heating car wrap films.

In order to make work as easy and time-saving as possible for users of similar products by other manufacturers, we have developed a universal heat gun holder that can also be attached to the vehicle with a powerful magnet.

The **YelloKNOX Mag** keeps every heat gun as safely parked as the gold reserves in Fort Knox: the holder prevents the heat gun from shaking around or falling out. The heat is dissipated through the vents to prevent a build-up inside the holder.

The heat gun is simply put in the YelloKNOX Mag and can be pulled out just as easily - the holder remains on the vehicle.

WrapGun II

Professional heat gun for installing car wrap vinyls and plotter films

With the electronically controlled **WrapGun II**, you get a powerful heat gun with a max. output of 2.200 Watts and a 5 m long, heat-resistant power cord. It enables you to move more freely and to continue your work without having to look for the next power socket. This also puts an end to the annoying dangling of the plug connection.

The WrapGun II also features a three-stage air volume regulation (150 - 500 l/min) and infinitely variable temperature adjustment (80 °C - 630 °C). In addition, there is a "cold stage" with 50 °C, and a 1-year warranty.

88,97 €

+ VAT & shipping

Product features:

- electric heat gun for vinyl applications
- max. power: 2.200 W
- adjustable temperature from 80 °C to 630 °C
- cold stage with 50 °C
- air volume regulation via 3 steps (150 - 500 l/min)
- heat-resistant power cord, 5 m length

CABLEFLYER

Cable guide for car wrap applications

The sophisticated wooden construction is simply pushed in front of the wheel and fixed in place. The cable now runs along the guide and can no longer get stuck.

HEATCAGE S

Protective cap & separator for Yellotools WrapGun II

This combination of protective cap and separator reduces the risk of injury when working with the WrapGun II; in addition, the HeatCage S Mag can also be parked within easy reach on the vehicle body thanks to its large magnetic plate.

YELLOSHUTTLE II

Infrared temperature gauge for filming work

The YelloShuttle II temperature scanner is perfectly matched to our WrapGun II heat gun (Steinel HG 2120 E).

EASYWEED POWDER

Marking powder for cutting contours

By dabbing with this purely organic powder, the cutting contours on plotted films become visible. The EasyWeedPowder can be removed without leaving any residue.

EASYWEED RING

Weeding aid to pick up vinyl scraps

The large plate for holding punches and other vinyl remnants can be carried comfortably on each finger of the hand with its adjustable Velcro fastener and kept ready within reach of the tweezers or weeding tool.

Thanks to the reusable Teflon surface, the double-sided self-adhesive pads can be replaced in seconds if necessary.

SIGNTWEEZER

Professional tweezers in two colors and sizes

Janus System *Dual head tools for efficient work*

Named after the ancient Roman god, the Janus tool system features two "heads": The slim Janus Handle has a fine thread at both ends, to which different tool tips can be attached. Depending on the application, you can use any combination of scalpel blade, weeding hook, piercing needle or drag knife blade. This makes it easy to weed plotter and textile films, pierce air bubbles or cut curves and circles in vinyls without having to change tools.

The **Janus system** offers you maximum flexibility with its various combination options: by simply exchanging the tool tips, you can quickly assemble the right tool for the current job.

The precisely machined threads make repeated tool changes very easy. The tool change is done utilizing a modular concept: One or two chucks (SlimChuck) for the blade, needle and hook or a Connector for the drag knife head (SwivelHead) can be attached to the Janus Handle. If you only use one end of the Janus Handle, the other end is closed with an Allen screw.

Product features:

- modular tool system for sign making and car wrapping applications
- supports any combination of scalpel blade, drag knife blade, weeding hook and piercing needle
- various application possibilities: cutting, weeding and removing air bubbles with only one tool
- scalpel blades are also available with Titanium coating
- all system parts can also be ordered individually

YelloPen

*Pen-shaped piercing tool -
now with a new design!*

The advantages of this piercing tool are, besides its ergonomic pen shape, the perfect needle guidance of the metal shaft and the reduced risk of injury: The needle tip simply disappears inside the handle at the push of a button - just like a ballpoint pen ;-)

In case the needle has become blunt, it can be reordered and replaced separately.

WrapStep Walk Wall Mount

Wall storage attachment for WrapStep Walk connector plate

NEW

19,90 €

+ VAT & shipping

Product features:

- When the job is finished, the connecting plate can be stored on the wall either lengthwise or crosswise with the optional WrapStep Walk Wall Mount.

- Dimensions: (L x B x H): 50 x 14 x 6 cm
- Weight: 0,7 kg

YELLOPEN MINI

**Easy-to-use bubble
piercing tool**

As with the larger version, its needle is retractable and disappears with the push of a button. The handy pen format allows the YelloPen Mini to be carried conveniently in any pocket or tool bag.

WRAPSTEP

**Wooden ladders for car
wrapping professionals**

- step ladder for car wrapping and cleaning applications
- two or three steps version
- max. load: 150 kg
- material: glued wood, 18 mm thick

WRAPSTEP WALK

**Connector plate for
WrapStep ladders**

- easy and time-saving assembly
- wall mount available separately
- material: wood

EDGEWRAP CUTTER

Cutting template for furniture wrapping

Cutting template for butt-joint or overlapping vinyl application.

APE CORNERTOOL

Angled cutting template

Due to the two angles (45° and 90°) and the two radii (3 and 6 mm) on the outer sides, the tool can be used as a perfect template on the object. The 45° angle additionally serves as a wedge for the so-called butt-joint cut.

HOLE N' CUT XXL

Transparent drill hole template

The Hole n' Cut is a drill hole and edge cutting template in one tool! A scale from 15 to 40 mm helps you to either make a straight cut or to drill holes at an even distance.

EdgeWrap Cutter Mastermind

Revised cutting template for perfect furniture wraps and sign edges

NEW

DES - PRODUCT
Designed by a signmaker!

Our long-time friend and customer Zigfrid Tijunelis from Sign Maker Tools Canada gave us the inspiration to add more features to the popular EdgeWrap Cutter.

The new **EdgeWrap Cutter Mastermind** offers the full range of features of the EdgeWrap Cutter, so that cuts can be made either butt-to-joint or with a single overlap. It also has additional cutting slots for uniform spacing, such as our WrapSlipCuts for window films: this allows the film overhangs to be cut uniformly in four steps from 0 to 20 mm for rear-side applications on tabletops and drawer fronts. In addition, 5 mm cuts are now possible for corner applications on furniture edges, in order to be able to conceal the film overlap even better. This produces perfect, flash-free results that meet even the highest demands.

SCAN & WATCH
VIDEO

39,90 €
+ VAT & shipping

Product features:

- cutting template for furniture wraps and advertising signs
- application can be done either overlapping or butt-jointed
- blade guides for straight or 45 degree cuts
- cutting slots for exact spacing when applying film on the reverse side
- material: POM, break-resistant
- dimensions (L x W x H): 13 x 17 x 0.8 mm
- weight: 180 g

360 Racer *Rotatable wrapping aid*

The idea for the **360 Racer** is based on the experience of our long-time friend and customer Florian Knirsch, who also offers furniture wrapping services with his company Knirsch Beschriftungen. Florian recognised the potential for a rotating stand with which furniture parts such as drawer boxes as well as smaller pieces of furniture such as shelves and bedside tables could be wrapped all around.

The base model of the 360 Racer comes with four wooden anti-slip pads which are covered with foam rubber. These pads run on metal rails and can be fixed at any distance from each other. This allows workpieces of various sizes to be placed on the turntable and rotated a full 360 degrees. The turntable offers a locking device that fixes it at intervals of 22.5 degrees. The 360 Racer can also be turned upside down to process larger pieces of furniture or boards: The square base plate is also covered with anti-slip material and can be used as a turntable, too.

In addition to wrapping small pieces of furniture and furniture parts, the 360 Racer can also be used to process sign blanks. For this purpose, we separately offer rubber suction cups in two different sizes, which are attached to the metal rails instead of the anti-slip pads.

Anti-slip pads made of wood, which are glued with pads made of foam rubber. These pads are included in the basic equipment.

The smaller SuctionCups are particularly suitable for softer sheet materials such as Dibond and Forex. Available separately.

The larger SuctionCups HD hold rigid plates made of glass, wood and metal securely on the swivel base. Available separately.

199,90 €
+ VAT & shipping

Product features:

- rotatable application aid for furniture wrapping and sign making
- solid construction made of Multiplex wood and aluminium profiles
- adjustable anti-slip pads for workpieces of different sizes
- lockable turntable
- can also be used upside down
- optional suction cups for sheet materials
- Quality Made in Germany
- weight: approx. 6 kg

YELLOSLIPCUT SET

Edge cutting aid
centimeters

- alignment and cutting aid for signmaking and furniture wrapping
- Material: stainless steel, plastic
- Diameter: 0 - 125 mm

YELLOROLLER FLEXI

Adjustable pressure roller

- pressure roller for bonding applications
- two different roll hardnesses with 30° / 65° shore
- five different roll widths from 50 to 200 mm
- high performance rolls with ball bearings
- stable and high-quality workmanship
- aluminum handle joints

YELLOGUIDE FLEXI

Edge cutter for sign edges
and window frames

- Cutting widths: 3 / 4 / 5 mm, adjustable by spacers
- trapezoidal blades with titanium coating for long service life

SPEED TIMBERRACK

Mobile film roll holder

- dimensions (L x W x H): 105 x 60 x 190 cm
- max. load capacity: 250 kg
- storage capacity for up to 42 rolls:
 - 20 rolls up to 60 cm
 - 22 rolls up to 120 cm

TREEMAXX EASYREACH PRO

Mobile film roll rack with roll dispenser

In addition to the ingenious holding mechanism, Treemaxx EasyReach Pro offers a film roll dispenser with cutting bar and length counter.

- holds up to 12 rolls
- roll dispenser with cutting bar included
- cutting mouse included
- meter counter included
- stable stand
- movable
- max. load capacity 400 kg
- Made in Germany

TreeMaxx Flexi

Mobile vinyl film roll carrier with adjustable roll holders

The **Treemaxx Flexi** is the ideal solution for storing vinyl film rolls with different widths. The sturdy wooden construction is designed to hold roll media with a core diameter of 3" and does not require metal bars for storage. Instead, the rolls are pushed onto wooden supports and secured on the opposite side with a slider. For better oversight, a storage card can be hooked into the slider. The slider is locked in the desired position by a clamp that is stored within easy reach in the side panel. This makes it possible to move the slider in or out depending on the width of the roll and to adjust the Treemaxx Flexi as needed.

Thanks to its robust fixed and swivel castors on the underside, the Treemaxx Flexi can be moved around the workshop as

required. This means that the material rolls are always ready for cutting, plotting or printing and easily movable to a free space.

The Treemaxx Flexi can store up to 16 rolls with a width of 100 to 160 cm at the same time. We offer three different sizes for rolls of window film, plotter film or car wrapping film.

from **549,90 €**
+ VAT & shipping

Product features:

- capacity: up to 16 rolls
- secure stand
- movable / shiftable
- two fixed castors and two swivel castors with brakes
- max. load capacity: 400 kg
- Quality Made in Germany

Available sizes:

- S - for roll widths from 100 to 126 cm
- M - for roll widths from 122 to 137 cm
- L - for roll widths from 137 to 160 cm

WindowFilm Butler *Apply window films the easy way*

When applying films to windows which are close to the floor, the material roll is often in the way or cannot be unrolled properly. This is frustrating and takes time.

With the **WindowFilm Butler**, we offer you a film roll holder for window films which keeps the film ready to unwind. Simply insert the tinting or decorative film roll and pull it

upwards to the window edge, then align and attach it

Two variants of the WindowFilm Butler are available.

The film is not contaminated when using the WindowFilm Butler due to the distance to the floor. Both can be quickly disassembled for transport.

WindowFilm Butler Fix *with suction cups*

NEW

First, the Butler is fixed to the window or the lower window frame using the suction cups. Then, additional clips are inserted to prevent the butler from tilting.

We recommend fixing it to the window frame so that no residue of the suction cups is left on the window pane.

WindowFilm Butler Floor *with base plate and castors*

The mobile version of the WindowFilm Butler can be easily pushed backwards or sideways with the foot after the film has been cut to size. The base plate provides storage options for small tools, like our WetMaxx flat glass squeegee, cleaning cloths, etc. Due to its distance from the floor, the WindowFilm Butler prevents the film from getting contaminated with dust or other particles.

Example image

NEW

from **59,90 €**
+ VAT & shipping

Product features:

- roll holder for window film applications close to the floor
- quick and easy mounting on the window pane or lower frame (Butler Fix)
- mobile version Butler Floor with storage options for tools and accessories
- clean application: no contamination of the window pane or film material

Technical data

- WindowFilm Butler Fix
- Dimensions (L x W x H): 50 x 16 x 7 cm
 - Weight: 0,5 kg
- WindowFilm Butler Floor
- Dimensions (L x W x H): 75 x 45 x 20 cm
 - Weight: 3,4 kg

TIMBERMAXX LIP MICRO

Large wooden squeegee with flexible lip and microfiber cover

TimberMaxx Lip Micro is perfect for slightly uneven, concave / convex or softer surfaces that give way when squeegeed (such as already mounted expo walls). This XXL squeegee allows you to apply vinyl films on even slightly rough surfaces without creating air bubbles. The sturdy squeegee lip is glued in place, the self-adhesive microfiber strips can be replaced if necessary and prevent scratching when applying glossy films.

From 30 cm up to 165 cm.

You can choose from eleven different sizes to meet your requirements.

SPEEDMAG HD

Mounting magnet

- holding force 100 Newton
- tractive force 10 kg
- shear force 3 kg
- for application work without assistance
- special coating protects car bodies and other surfaces
- weight incl. handle: 42 g
- dimensions of the magnetic plate: 43 x 6 mm
- maximum operating temperature: 60 °C

TWISTER**Mobile film roll holder**

Thanks to our Twister, the required film rolls now remain upright and ready to be used at the plotting machine or printer. You can order the Twister in two variants, for either 2" (5,08 cm) or 3" (7,62 cm) diameter roll cores.

TWISTER SINGLE**Rollable film stand for 2" or 3" film rolls**

The "Single" is used for in-house transport of heavy media rolls. Of course, it can also be used for permanent storage. You can order your Twister Single in two variants, for either 2" (5,08 cm) or 3" (7,62 cm) diameter roll cores.

TWISTER VEGO BRACKET**Double your Twister's capacity!**

With the Twister VEGO Bracket, you can store 18 film rolls on only 0.3 square meters of space!

TwisterSlot 6 & 9*mobile film roll holder*

Twister Slot is the latest member of the Yello-tools Twister family: With this mobile film roll holder, up to 9 rolls can be stored on only 0.3 m² of space and pushed from the storage area to the printer, plotter, etc. and back as required.

In addition, Twister Slot offers the possibility of lifting the heavy rolls by using the TimStick, which is easy on the back, and then placing them back on the roll holder: The recesses in the base plate are dimensioned in such a way that the hook-shaped end of the TimStick can be inserted precisely into the roll core. A frame on the bottom of the Twister serves as a guide. The lifting aid is designed so that the lifted rolls can be placed horizontally on the cutting table, plotter or printer in a single motion.

The four milled holes of the base plate also allow the Twister Slot to be pulled around with the TimStick. The TimStick can then be placed within easy reach in the separately available TimStick Station.

We offer the Twister Slot in two variants, either for 6 or 9 rolls with a roll core diameter of 3" (7.62 cm).

**Example image****TwisterSlot Stripe***Narrow floor shelf for space-saving storage of 7 rolls of vinyl film*

With the **Twister Slot Stripe**, we are expanding the range of products around the new TimStick: the practical lifting aid can be used with both the rollable Twister Slot and this narrow floor shelf. It allows you to make optimal use of the available storage space, especially in smaller premises: Simply place the Twister Slot Stripe next to, behind or between your printers and plotters.

The rolls are then directly within reach. The wooden crosses are designed to fit roll cores with a diameter of 3".

**Example image**

from **84,90 €**
+ VAT & shipping

Product features:

TwisterSlot Stripe

- net weight: 4 kg
- capacity: up to 7 rolls, max. roll width 150 cm
- dimensions (L x W x H): 119 x 20 x 23 cm
- sturdy multiplex construction
- Quality product
- Made in Germany

TwisterSlot 6er & 9er:

- mobile film roll holder for 6 or 9 rolls
- sturdy wooden construction
- max. load capacity: up to 200 kg
- freely rotatable castors

- material: multiplex wood, coated
- dimensions (W x H x L): 55 x 23 x 40 cm
- net weight: 4.4 kg
- capacity: 6 film rolls, max. diameter 17 cm per roll
- Quality product
- Made in Germany

The TimStick

Lifting film rolls easily and back-friendly!

Thanks to this brilliant idea from our customer Tim Lafrance of East Coast Sign & Design in Lewiston, USA, the annoying bending down when handling heavy rolls of film is now a thing of the past. **The TimStick** in combination with the Twister Slot or Twister Stripe Slot is the ideal aid for storing rolls of film. The ergonomically shaped handle allows you to lift heavy rolls of film with ease: simply hook the end of the TimStick into the core of the film roll and lift it up, holding the upper end of the roll with your other hand. The film material is then carried horizontally to the printer or plotter and placed there. The entire process is done with no need to bend down.

The TimStick has two milled grip areas, one at the upper end and one slightly lower, around the middle of the stick. The lower grip section is good for lifting smaller rolls of film up to about 1 metre in width.

When the loaded Twister Slot needs to be moved from its storage place to the printer, plotter or cutting table, it can easily be pulled

using the TimStick. The lifting aid can then be placed in the separately available TimStick Station, where it is always ready to hand.

TimStick Station

Holder for Yellotools TimStick

When the TimStick is not needed, it can be stored in the **TimStick Station** directly at the Twister Slot or Twister Stripe Slot.

A pivot at the lower end fits into a recess in the base plate of the TimStick Station, while the upper end of the lifting aid leans against the holder through a cut-out.

The TimStick is then safely stored so that it cannot fall out of the holder.

from **19,90 €**
+ VAT & shipping

Product features:

- The TimStick
- lifting aid for film rolls
- back-friendly lifting, transport and storage
- two ergonomically shaped handle areas
- compatible with Twister Slot / Twister Stripe Slot
- material: coated Multiplex wood
- Quality product Made in Germany

- TimStick Station
- holder for TimStick lifting aid
- compatible with Twister Slot / Twister Stripe Slot
- material: coated multiplex wood
- Dimensions (L x W x H): 7 x 12 x 65 cm
- Quality product Made in Germany

TWISTER MAGNUM

Mobile film stand with turning top for 2" or 3" roll cores

The roll holder can be easily moved from A to B, locked in place with the four heavy-duty stop casters, and rotated on the spot.

MEDIACARDS

Labeling cards for film rolls

MediaCards label all roll media with 2" or 3" cores. The hanging version MediaCards Hook is also available. Several info boxes on the cards provide enough space for important product information.

SPEEDCLIP

Film roll clips

These handy clips hold roll media securely together and save you lots of adhesive and masking tape.

The high-quality plastic compound is free of carcinogenic plasticizers and ensures optimal shape recovery.

YELLOMONKEY

Wall holder for films and print materials

The easy-to-mount wooden brackets contain several wooden "ball bearings" that hold the freshly printed media ready for degassing and drying in a simple, quick and space-saving way.

YELLOSPARE BRACKETS

Shelf for vinyl remnants **WITHOUT** core

- sturdy wooden construction (2x H 90 cm x T 11 cm)
- hole diameter ca. 8 cm
- Made in Germany
- space-saving storage
- optional wall or under table mounting
- individually mountable width

TWISTER WALLMOUNT

Film roll rack for wall installation

- solid multiplex construction
- untreated birch plywood
- load capacity: up to 10 kg per roll
- horizontal or vertical alignment

NEW

YelloSheet Slider

Adjustable sheet material storage rack

Sign makers use a variety of materials such as acrylic glass, wood, forex, glass, metal and multi-layered materials such as Dibond in the production of signage, illuminated signs and other promotional displays. These are commonly available in the form of differently sized sheets. Depending on the size of the workshop, it can be difficult to store these sheets in a space-saving and secure manner. Usually, they are then placed wherever there is free space.

With the **YelloSheetSlider**, we offer a height-adjustable wall rack for storing material sheets of different sizes. Mounting it on the wall ensures safe storage and removal at any height.

The YelloSheetSlider is adjustable in height at three different positions:

- Position 1: for small-format sheets up to 1.09 m of width
- Position 2: for medium-format sheets up to 1.29 m of width
- Position 3: for large format panels up to 1.50 m of width

The length of the rack can be extended by connecting multiple sections together. Each section extends the YelloSheetSlider by 1 meter. The usable depth is 10 cm.

139,00 €
+ VAT & shipping

Product features:

- wall rack for sheet materials
- adjustable size for different material formats
- dimensions (W x H): 100 x 126 cm
- material: multiplex wood, coated
- max. load capacity: 150 kg (when mounted properly)
- The YelloSheetSlider is delivered unassembled. Illustrated assembly instructions are of course included.

Wrap-U-ezee Flat

Application aid for protruding vehicle parts

The regular Wrap-U-ezee is the perfect application aid for wrapping large and protruding vehicle add-on parts such as exterior mirrors.

The concept of a U-shaped wrapping ring can also be applied to smaller or lower-profile parts: With the **Wrap-U-ezee Flat**, door handles and GPS antennas are vinyl wrapped directly on the vehicle without having to remove them.

from **26,15 €**
+ VAT & shipping

GeckoPatch

The magnetic solution for non-magnetic surfaces

GeckoPatches are available in four variants: sizes S, M and L are particularly suitable for flat surfaces, and the GeckoPatch Flexi is also usable on curved surfaces and even around corners!

The self-adhesive pads can be removed without leaving any residue and serve not only as a mounting aid, but also to "park" tools such as our WrapSticks (except Eco) or the TonnyMag Basic magnetic squeegee within reach.

from **10,38 €**
+ VAT & shipping

BodyGuardKnife

Special-purpose knife for film backing papers

The Yellotools **BodyGuardKnife** is the ideal knife for cutting all kinds of films and vinyls. It protects the surface of the material as well as the substrate from damage thanks to its sturdy stainless steel blade guide: A special Teflon pad increases the gliding properties and guarantees a clean and safe cut. Self-adhesive films, silicone and backing papers can be cut separately or

together with this high-quality specialty knife. The ergonomic handle pads and the refined surfaces of the knife holders make the BodyGuardKnife a "must-have" for professional signmakers.

26,10 €
+ VAT & shipping

Product features:

Wrap-U-ezee Flat

- Application aid for exterior mirrors and other automotive attachments
- fast workflow during application
- even adhesion of the film

GeckoPatch

- self-adhesive pads with metal plate
- sticks to all smooth surfaces
- reusable as often as you like

BodyGuardKnife

- vinyl film liner cutter for clean & safe cuts
- excellent gliding properties
- glide base with high-quality Teflon pad (pad can be ordered separately)
- optional Teflon gliding foot (can be ordered separately)

WRAP-U-EZEE

Car mirror wrapping aid

Since the film is evenly pre-stretched with this tool, the risk of overstretching in critical areas such as mirror housing edges is significantly reduced: The film material is stretched less and adheres more evenly than with a purely manual application without using the Wrap-U-ezee.

TONNY MAG BASIC

Magnetic squeegees for signmaking and car wrapping

Thanks to the powerful magnetic force, this squeegee can also be used for positioning and aligning digital prints and plotted graphics!

TITAN BLADES 10 PACK

Titanium replacement blades set for the BodyGuardKnife

With these extra-sharp replacement blades, you can cut effortlessly, precisely and cleanly through backing papers, for example when designing advertising materials.
