TIMES ARE CHANGING...

Signmaking / CarWrapping is always both.
Old school skills, craftsmanship but also todays technology at the highest levels

We also always try to combine the oldschool ways of communication (Catalog, Tradeshows, one2one Trainings) with the convenient but impersonal digital substitute.We often feel that it's a mix of both which makes the cookie yummy! After the long phase of personal absence from ya'll, we couldn't wait for the re-start…BUT, we didn't want to go back to "Business as usual". You taught us, that you love the fast and 24/7 available information flow through all channels over the world wide web but you would also appreciate a personal note.

So this is our new approach:

The "YelloHybrid Cataweb". It's a Catalog. It's a Webshop. It's a real Tooldisplay.

And it's a very nice interaction with all three of them.

This is how it works:

The printed catalog basically works on its own as an overview about our Product range. But instead of waisting paper with showing boring pictures of a lookalike application, it leads you to the certain website with all detailed information, pictures and videos about the product. A litte number in the column of the item in the catalog indicates the location of the real product at a Tradeshow or the Showroom of our Distributors at the Tooldisplays.

And it also works vice-versa:

While at a Show or a Showroom you will find that number at the Display right next to the Item. **Scan the QR Code** at the Tooldisplay OR look for the number in the Catalog and get all the Information about the product you need.

We hope, you like this new approach and we can't wait for your feedback.

Your Yellos

LEAN-STATEMENT

Every thing we do is based on the Japanese concept KAIZEN (or TPS - Toyota Production System). Our top priorities are: "Use your brain, not your wallet" and "There's no end to improvement". "Improve your life for at least 2 seconds every day". The philosophy of KAIZEN is a central component of our success. KAIZEN or LEAN-THINKING isn't a religion or a seminar. It describes a way of thinking, which is able to improve work life and private life a lot. This way of thinking is included in every thing we do since more than 9 years now. But KAIZEN or LEAN's a lot more. Just visit our manufacturing in Windeck and meet one of the friendliest and most motivated teams I ever saw!

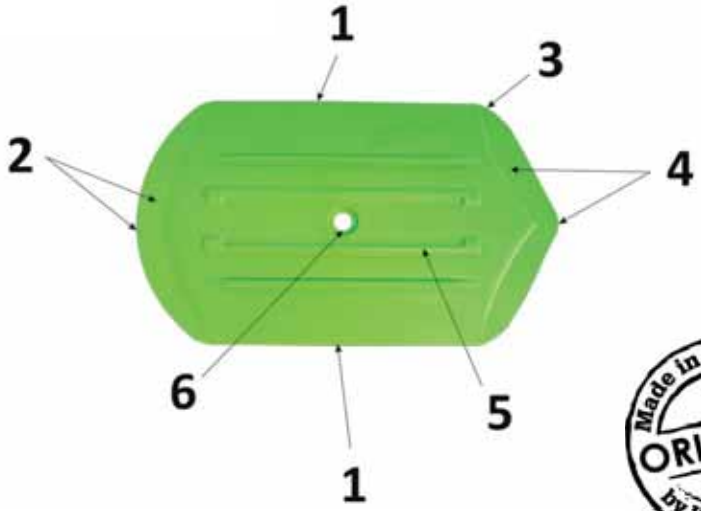
ProWrap 360

Our dear customer Michel Wülpern of Folientechnik Rotenburg asked us to realize his „dream squeegee“. The arguments for this innovative new application tool convinced us, and from now on, we will enrich the world of self-adhesive products with this smart fellow :)



These are the features that convinced us:

1. In addition to the „standard“, 76 mm long application blades which ensure the usual way of working, special features are the perfect haptics of the handy shape and the different side parts. Thanks to a new injection method, this squeegee is completely usable all around - hence the name 360!

2. The left side allows not only a permanent 30° work angle to the film as with our popular ProWrap Betty squeegee - due to the flattening of the squeegee lip, it is now also possible to transfer the entire squeegee surface with uniform contact pressure to the entire contour. This feature allows the film to be applied deeply behind sealing rubbers or headlight housings.

3. The right side is rounded at the top and bottom to the application blade flank to guarantee a smooth transition during the spreading motion and no damage to the surface (film or object).

4. The rounded and flattened tip of the right side allows, on one hand, the lifting of rubber seals before or during the application and is perfect for applying films in joints and beads longitudinally in one movement. Here, too, the 30° angle ensures crease-free results.

The rounded overall shape also prevents annoying puncturing and scratching of the tool in your trouser pockets. It comes with the typical Yellotools grip surfaces (5) and features the practical center finder (6) for quick positioning of the squeegee in the palm of your hand.

The ProWrap 360 is available in three different degrees of hardness (shores):

• **Green (40 Shore D)**: very soft and flexible; for curved, round parts such as fenders, mirror caps, helmets, etc.

• **Gold (72 Shore D):** medium soft; the classic option for all sign making applications

• **Teflon (89 Shore D):** very hard, refined with Teflon technology; high gliding properties; for use on seals and window frames (cutting and squeegeeing)

Of course, custom-fit YelloWings squeegee pads made of Polyester or Teflon coated material are also available for the ProWrap 360. Wings are 32 cm x 1 cm.

DBS - PRODUCT
Designed by a signmaker!

Yel-Lo Plek / Plek Blade

Car wrapping expert and trainer Rainer Lorz made his wish come true and designed his dream squeegee, which he had been planning for a long time. He wanted a vinyl squeegee that one likes to hold in the pocket as well as in the hand and that is absolutely multi-functional. And so the collaboration of Yellotools and Rainer Lorz lead to the new „plectrum squeegee“ Yel-Lo Plek ;-)

No matter if it‘s signmaking applications, vehicle window tinting, car wrapping or PPF applications: with the different shore hardnesses and two different cross-section profiles, the Yel-Lo Plek is perfectly usable as a mini-squeegee for applications on narrow or slightly curved areas of the car body, for deeper lying areas such as bumpers or for lifting rubber seals.

Thanks to its pleasant and ergonomic shape and the hole in the center (CenterFinder), this squeegee is turned naturally and quickly like a spinner to the desired application, e.g. to gradually press on film edges without damaging the material.

We are convinced that Rainer‘s extraordinary design will find many enthusiastic users in the car wrapping scene ;-)

Product features

DBS - PRODUCT
Designed by a signmaker!

- versatile squeegee
- ergonomic shape with CenterFinder
- designed by Rainer Lorz
- four different Shore grades
- fitting polyester squeegee pads (sold separately)

The Yel-Lo Plek squeegee is available in the following variants:

- **Soft (35 Shore D):** very soft and flexible
- **Green (40 Shore D):** soft and flexible
- **Gold (72 Shore D):** medium soft,
- **Teflon (93 Shore D):** very hard, with Teflon refinement

Made in Germany ORIGINAL by Yellotools.com

Z-Stick Duo & Sandwich

Zigfrid Tijunelis of Sign Maker Tools Canada suggested another product idea: He noticed that our APE Duo and PPF Sandwich squeegees work great on hoods, bumpers and doors, but are too big for detail work. So he suggested we should offer a mini version of these multi-layer squeegees, which can be used to work on air vents, headlight frames, door edges and much more.

From now on, the Z-Sticks will complement our range of products for paint protection applications, so that PPF installations become be a perfect job even in difficult places.

Made in Germany ORIGINAL by Yellotools.com

WetMaxx

Perfectly apply films on glass panes and vehicle windows with Yellotools WetMaxx

The new **WetMaxx** squeegee system makes wet application of window films, tinting films and decorative films easier than ever: The squeegee blade, specially developed for flat glass applications, glides smoothly over the film and expels the application fluid without leaving any air pockets. Be it UV protection films on office windows, decorative films on partitions in the restrooms or window tinting films on rear and side car windows - Yellotools WetMaxx is the ideal tool for professional applications in signmaking and car wrapping! The squeegee blade is available in two degrees of hardness and three shape variants: the orange version with 90° shore is perfect for applications on curved vehicle windows, the white variant (95° shore) is designed for flat glass surfaces such as shop windows and glass facades. In addition to the rectangular version with a width of 130 mm / 5“ (only in 90° shore), we offer two trapezoidal versions with widths of 130 and 160 mm / 5“ and 6.3“ and 15° of edge angle, each available with 90° and 95° shore.

Heavy-duty design for easy handling and long durability

Two sturdy aluminum retaining plates hold the **WetMaxx** squeegee blade securely in their center, and the ergonomic handle is equipped with a non-slip, skin-friendly material. The tilt angle of the squeegee blade is continuously adjustable. To do this, simply loosen the holding screws, adjust the angle and then re-tighten the screws. To protect the film material from scratches, we have covered the lower holding plate with our proven microfibre fabric. This patch is pre-assembled and can be reordered individually.

Versatile & customizable squeegee for different uses

Depending on the job, **WetMaxx** can be quickly modified, for example by replacing the squeegee blade or mounting the additional handle for more contact pressure. WetMaxx is a tool with lots of potential uses and can easily replace many other application tools in your tool bag! All components of the **WetMaxx** squeegee system are available individually: From the squeegee blade to the handle to the extra grip handle, you can assemble your **WetMaxx** individually. As a standard recommendation, we offer the handle together with the different squeegee blades in pairs.The system can also be ordered as an All-in set: With this you get all individual parts in a complete package to be directly prepared for all requirements ;-)

Product features:

- Heavy duty squeegee system for wet applications on glass surfaces
- Two degrees of hardness available: 90° and 95° Shore
- Three shape variants: 130 mm rectangle / 130 mm trapezoid / 160 mm trapezoid
- Squeegee blade dimensions (W x L x H): 130 x 50 x 6mm / 5“ x 2“ x .23“ (S / T / TH 130) resp. 160 x 50 x 6mm / 6.3“ x 2“ x .23“ (T / TH 160)
- Ergonomic, non-slip aluminum handle
- Length of handle: 150mm / 5.9“
- Infinitely adjustable angle of inclination
- Microfiber cover for scratch-free application
- Additional handle for more contact pressure during application

ProBasic Zero & ProWrap Zero

The latest innovation by Yellotools: Squeegees made from biodegradable plastic!

In times of resource scarcity and increasing environmental pollution, using new materials and material mixtures to manufacture environment-friendly products is a reasonable and sensible effort to contribute to the preservation of our planet. So join us on the road to a more sustainable future - we're taking another step with the new **ProWrap ZERO**, the first squeegee line made from a purely bio-based material!

The right stuff for the future: no silicone, no petroleum, no microplastics!

The plastic material of the **ZERO squeegees** consists of 100 % bio-based components, 30% of which are obtained from renewable raw materials such as sugar cane and cellulose. Thanks to this innovative blend of ingredients, **ProBasic ZERO** and **ProWrap ZERO** provide unique features: The material is biodegradable, usable for industrial decomposition and burns CO_2-free, as the plastic contains no petroleum or silicone. It also complies with the European REACH regulation and is food-safe, meeting the FDA's requirements for approval as well.

Yellotools's **ZERO squeegees** can be used without restrictions for film application jobs in signmaking and car wrapping. With a rather soft Shore hardness of 50°, they are particularly usable for vinyl installations on curved and rounded surfaces. The proven ProBasic and ProWrap shapes allow for all YelloWings 4" squeegee pads to be used.

Product features:

- Plastic squeegee made from biodegradable material blend
- Food-safe, BPA- and phthalate-free
- ZERO microplastics after decomposition or incineration
- ZERO petroleum based substances
- ZERO residues
- 100% REACH & FDA compliant material
- 100% biodegradable
- 100% CO_2 neutral combustion
- 100% closed CO_2 cycle

With the new **ZERO squeegees**, we are setting an example for more environmental awareness - wouldn't you like to support us in spreading this message in the signmaking community?

NEW

WRAP DEFENDER

Made in Germany ORIGINAL by Yellotools

DBS - PRODUCT Designed by a signmaker!

Our WrapDefender is a special knife that will change the way you work and reduce damage to vehicle paintwork, sealing rubbers or unpainted attachments. Many thanks for the great cooperation with „The CarWrap Trainer“ Rainer Lorz.

Wherever you use this knife, you'll love it; preparation of prints, plots, or foils, while labeling, handling ppf and especially when car wrapping. The WrapDefeneder protects you from cutting into the surfaces next to the vinyl so you can work fast and safe. The use of the WrapDefender is unlimited, so it'll become your "constant companion" during everyday work life.

Wrap Defender Mini - Shorter version of the original Wrap Defender. Ergonomic handle and perfect for filigree cuts.

Wrap Defender Grip - Perfect for working with adhesive gloves. The handle makes it easier to grip the tool and it is easier to guide it.

WrapDefender 45R / 45L - Perfect for making cuts in hard-to-reach areas where the handle would be in the way. With a left or right bend.

WrapDefender Loony - Perfect for cuts behind components / areas in front of it, such as radiators, furniture, window frames, car parts.

TwinBase Handle

You want a little more pressure on your squeegee surface? A little more ergonomics for larger projects or simply a longer arm for hard-to-reach corners? From now on this is no longer a problem. Our new squeegee handle TwinBase Handle allows you to do all that.

Whether as a pure handle with a 15cm long shaft, a 60cm extension or extendable up to 90cm: No problem. Thanks to the innovative „half-squeegee technology“ of the TwinBase system, you can insert any desired squeegee hardness into the headpiece. The TwinBase Handle is delivered with our YelloTwin Lip Gold. This gives you maximum flexibility and
a solution for even the most complicated applications.

TwinBase Handle 15

Versions:
- **TwinBase Handle 15**
- **TwinBase Handle 60**
- **TwinBase Handle Flexi**

NEW

Made in Germany ORIGINAL by Yellotools.com

Maximum flexibility with an extendable handle up to 90 cm

NEW

Gecko Patch POWER

Extreme adhesive force on non-magnetic surfaces!

Many of you wished for a little more holding power for larger graphics or higher loads. We are fulfilling this wish with the GeckoPatch Power Line. The stronger sheet metal carrier allows a threefold increased pulling force of the magnets. We recommend using the YelloBlade or at least two-handed operation when removing POWER Patches, e.g. from glass panes.

3-fold adhesive force due to 1 mm thick sheet metal!

Pads are reusable and are easily cleaned of dust and dirt particles with the GeckoClean.

Made in Germany ORIGINAL by Yellotools

NEW

MaliCut

Kevin Kempf from PG Nola wanted a knife with which he could cut around corners: In deep body-work crevices, such as on pickup trucks, he wanted to make an invisible undercut between the cab and the truck bed so that no streak of the original paint would come through. So we tinkered with this idea until finally the MaliCut emerged ;-)

The blade holder of the MaliCut is designed in such a way that a blade piece from commercially available snap-off blades can be inserted at an angle of 45° or 90°. Of course, our professional spare blades such as the TitanBlades or BlackBlades also fit into the MaliCut. The high-quality workmanship Made in Germany helps to perform this tricky application.

A BladeBreaker Mini is included so that the blade pieces can be stored safely.

Product features:
- **special blade for undercuts**
- **for use with blade pieces**
- **blade position: 45° or 90°**
- **dimensions: 210 x 80 x 38 mm**

Made in Germany ORIGINAL by Yellotools

DBS - PRODUCT Designed by a sign maker!

YelloPEG System

NEW

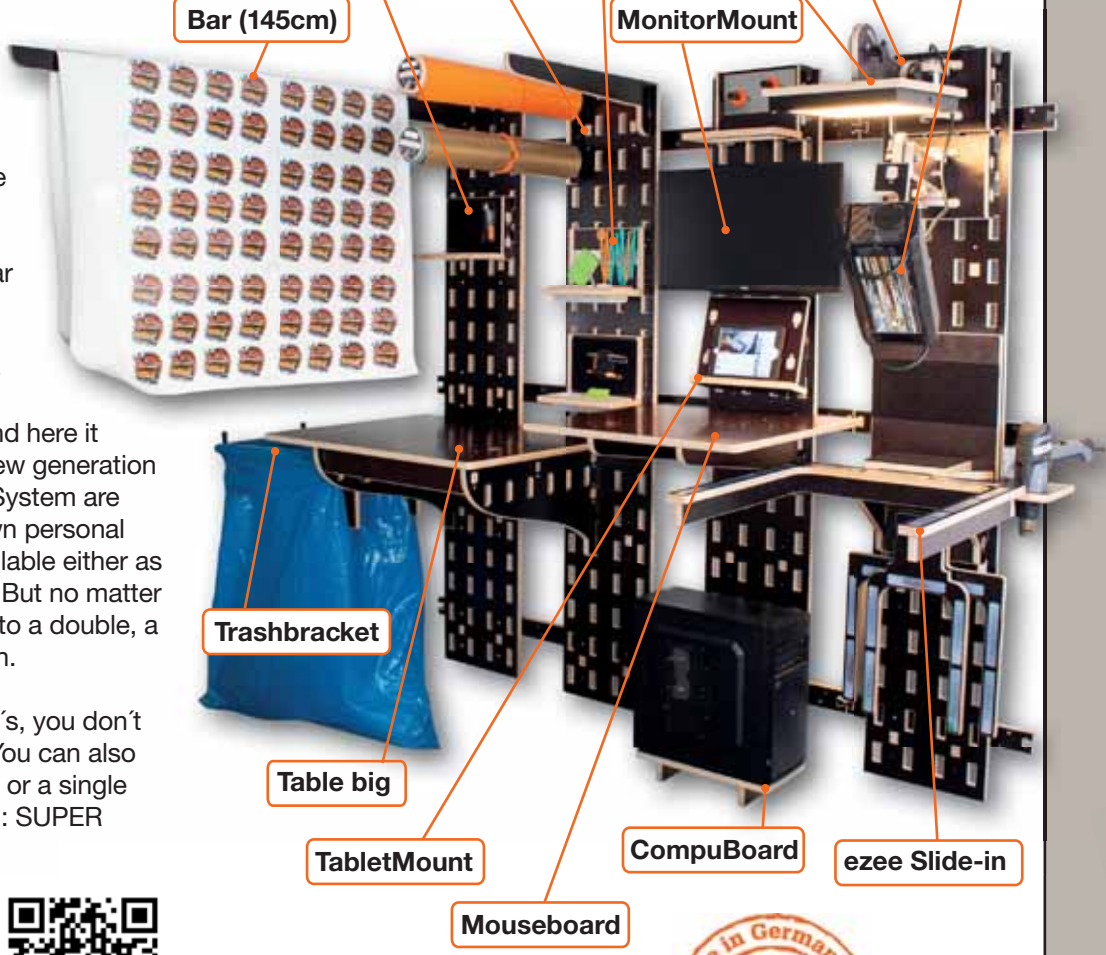
Probably the most flexible and versatile PEG Wall System for Carwrappers and Signmakers EVER.

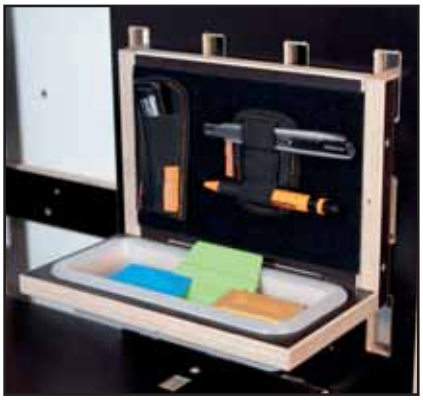
It all started with the question of how we can fix a disassembled Door-handle, Mirrorcap or Sharkfin antenna to wrap it as easy as possible without giving stress to the vinyl at the wrong areas. Well…after a few beers someone said “Why do we try to fix the object and not the vinyl like we do at the WRAP-U-EZEE?” A star was born!

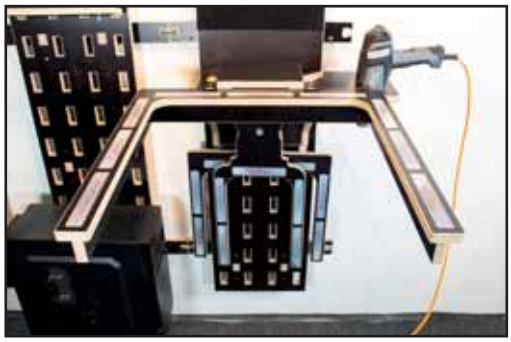
While we thought about all kinds of clamps or brackets, that PEG System grew more and more. And here it is! Ladies and gentlemen: The new generation of WRAP. Since all items in this System are individual, you can build your own personal “WrapWall”. The Boards are available either as a single unit or as a triple board. But no matter what, you can extend the single to a double, a triple to a quadripartite and so on.

To use the Wrap-U-ezee Slide-in´s, you don´t have to buy one of the Boards. You can also go with an optional Benchbraket or a single Wallmount Bracket. Like we said: SUPER FLEXIBLE.

Check this out in our online shop.







NEW

Wrap-U-ezee Slide-In

To use the Wrap-U-ezee Slide-in´s, you don´t have to buy one of the Boards. You can also go with an optional Bench-braket or a single Wallmount Bracket.

Wrap-U-ezee Flat

DBS - PRODUCT
Designed by a signmaker!

From now on the Wrap-U-ezee family has a new member: With the help of the new Wrap-U-ezee Flat, many add-on parts can now be wrapped directly on the vehicle without disassembly. The freshly hatched Flat is narrower than its big brother and, thanks to its 6 mm thick, scratch-free material, it is also a lot more flexible.

The pre-stretched film is simply placed on the add-on part from above, squeegeed and finally cut to size.

NEW

NEW

Wrap-U-ezee Bumper

„Can‘t you make these great tools big enough to pack a whole car?“

We have heard this question many times. No - unfortunately we cannot ...

But we can also produce a tool that is big enough for bumper corners or very large chassis parts: We are introducing you to the “bumper version” of the Wrap-U-ezee family! You can now benefit from the stress-free installation on these larger areas.

Have fun wrapping!

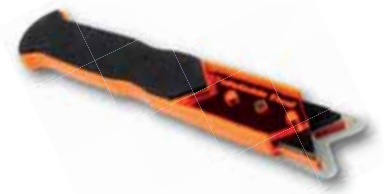
by Yellotools.com

CUTTING

In our Online Shop you will find an extensive selection of cutting tools for the advertising technology and car wrap that you really need and make your daily work even more efficient. Whether it is the clean and fast processing of foils or the installation of stickers - it all depends on the right cutting tool.

SasserCut Pro / SasserCut Pro Set 8.2 8.3

Roller-guided splitting knife for vinyl cutting on car doors, fuel caps and the like. It has a standard immersion depth of 5.3 mm. With the replacement rollers you can easily change the depth to 4.0 or 6.5 mm.



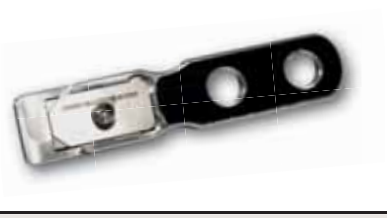
YelloGuide Flexi 8.1

The ingenious 16-in-1 sign making multi-tool for internal and external distance cuts. With the YelloGuide Flexi you can cut along an inner or outer contour with a distance of 3, 4 or 5 mm.

WrapDefender Crew

The WrapDefender is the first safety knife for vehicle flippers with which you can easily cut curves, for example to trim the foil with paper in the wheel house. The easy to change, super-sharp and stainless steel scalpel blade is superior to any cutter blade.

from 1.10



AngelCutter 8.20

Edge Trimmer for thin cuts on the edge of your sign, usable on both sides. Adjustable cutting widths 0.5mm, 1.0mm, 1.5mm. The blades are exchangeable.

AllStar Cutter 7.13

The AllStar Cutter - a cutting shoe from the BodyGuardKnife, integrated into our AllStar Gold plastic squeegee. This allows the film to be prepared and directly applied.

YelloLip Cutter 7.12

A BodyGuardKnife cutting shoe as an insert for our popular YelloTwin. Here you can insert the knife into the YelloTwin Base. One side will have any of the squeegee shores you prefer and the other will have the Cutter!

BodyGuardKnife 7.1

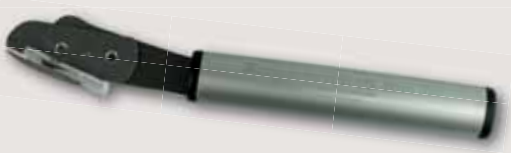
Vinyl Cutter for release paper with ergonomic grip. Our „BodyGuard Knife“ protects your graphics or the ground with its stilt. A special teflon sticker increases the sliding property and guarantees a precise and safe cut through your vinyl or the application tape!

BodyGuardKnife Teflon 7.4

Vinyl Cutter with a special teflon coating. The Teflon coating guarantees a clean and safe cut through your vinyl or the application tape.

BodyGuardKnife Pro Teflon 7.5

The „PRO TEFLON“ safety knife has an extra sturdy aluminum handle, including a compartment for storing spare blades.



BodyGuardKnife Duo HD 7.11

The safety knife is also available as a „Heavy Duty“ version with the „Big Grip“, with which pull or push cuts can be carried out without any problems.

BodyGuardKife TWIN 7.9

The safety knife for cutting out a median strip in one step.

BodyGuardKife TWIN Teflon 7.7

The safety knife with teflon coating for cutting out a median strip in one step.

BodyGuardKife TWIN Flexi / Flexi Teflon 7.3

The 2-in-1 vinyl cutter in five different cutting widths. You can freely choose the cutting distance according to your application. Different spacers: 14mm, 17mm, 22mm and 27mm, 42mm

7.6

ProTeflon Shoe

Teflon coated stilt for the BodyGuard Knife.

7.2

Teflon Shoes

Changeable Teflon-Pad´s for the BodyGuard Knife.

TinnyCut / TinnyCut Mag 8.22 8.23

The “Tinny Cut” is very slim, has a longer cutter control and a super sharp and long lasting inox blade. Also available with a holding magnet on the backside.

LongReach Duo 7.17 7.20

The brilliant „arm extension“ is available as a practical 2-in-1 version for push and pull cuts. Of course, this vinyl knife with extended handle is equipped with the head of our ingenious BodyGuardKnife. Available in lengths of 60cm and 90cm.

LongReach Duo TWIN 7.19 7.22

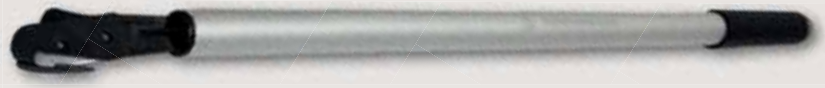
Vinyl Cutter with arm extension for double cuts. Available in lengths of 60cm and 90cm.

LongReach Duo Mag 7.18 7.21

Vinyl Cutter with arm extension and integrated magnets. Available in lengths of 60cm and 90cm.

LongReach Duo Pro Teflon

Vinyl Cutter with teflon coating and with arm extension. Available in lengths of 60cm and 90cm.



LongReach Duo Flexi Pro Teflon 7.23

Cutting plotter with teflon-coated stilts and extendable arm extensions from 75 to 100 cm.

LongReach Duo Mag Pro Teflon

Vinyl Cutter with teflon coating, integrated magnets and an arm extension. Available in lengths of 60cm and 90cm.

BladeBreaker mini 8.7

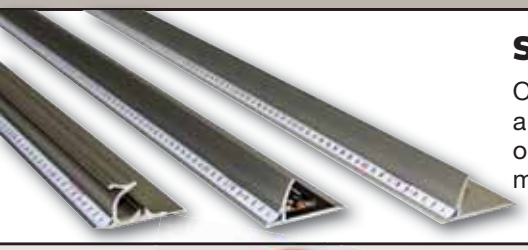
With the snap-off blades box BladeBreaker Mini you can easily and safely break off all 9 mm blades and let the blade and make the blade remainders disappear directly into the inside of the blade box. The tiny blade box fits in every tool bag!

BladeBreaker HD black/silver 8.4 8.5

It has never been easier to snap off cutter blades. The robust and sturdy body of the blade box is made of aluminum. Thanks to the practical magnetic closure, the broken blades are held securely inside the box.

BladeBreaker Pro 8.6

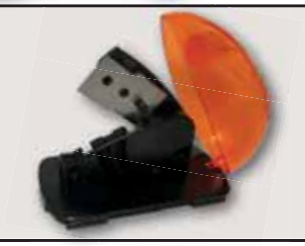
The snap-off blade box with a small removable magnetic plate in the lower seat area. The magnet holds the small demolition residues and tips on the bottom of the box. This finally stops the annoying jingling of the metal splinters and allows the debris to fall out only if you want it!



SafetyRuler Family

from 8.50

Our SafetyRuler are safety at work and pure ergonomics. The Ruler has a high-quality rubber coating on the rear side, providing firm support on all smooth surfaces and is available in any intermediate size up to a max. Length of 16.4 ft (5m).



CutCoaster

8.49

The Cutting Mouse for the SafetyRuler Platin with maximum cutting comfort with minimal effort for precisely straight cuts. It is for high security and effortless cutting, even on thicker materials.

CutCoaster Wheel

8.51

Cutting Mouse with round blade for the SafetyRuler Platin. Textiles and fabrics can be cut more comfortable with the circular blade of the cutting mouse, just like all other fibrous materials.

SafetyRuler Platin Combo

The Signmaking Cutting Ruler with integrated cutting mouse. Due to the practical scaling on the front, you can always orient yourself precisely. Thanks to the raised protective edge, the cutting ruler can always be safely used with the cutter knife, too.

EasyLink

8.48

Cutting Ruler Extension - The Cutting Ruler Extension connects your SafetyRuler Platin very tightly. Its worth to mention that it also glides like a Formula 1 racing car in its special track.

YelloCut Crew

from 8.8

Professional cutter for singmaker and car wrapper. Here you will find the right tools for perfect work results.

HeroKnife Swivel/Straight

8.26 8.27

Short vinyl scalpel for hard-to-reach-places. Our HeroKnife Swivel with rotating swivel knife is perfect for tight curve cuts and the HeroKnife Straight with a fixed blade is for tight bends.

SwivelKnife

Cutter with rotating drag knife blade. The knife is so handy that curved lines, ornaments and circles can be cut freehand. Thanks to the soft-grip rubber coating, the cutting tool does not slip out of your hand.

Janus SwivelKnife

8.28

Slim scalpel for signmakers with integrated piercing tool that is also great for weeding plotted vinyl films.

BallpenWeeder

The signmaker‘s knife with scalpel blade is ideal for cutting foil materials, plastic and foam boards. The other end of the tool with a ballpoint pen refill is available for making notes or marking the next cut.

SingleWeeder 8.31 12.37

With the extra-sharp scalpel blade, filigree detailed work is made much easier. In addition, thanks to the SoftGrip rubber coating and the fine blade tip, this scalpel is also ideal as a weeding tool for plotted lettering and graphics.

JanusWeeder 8.30 12.36

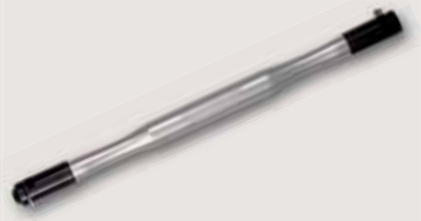
The signmaking precision knife „JanusWeeder“ should be in everyones tool bag because it combines a high-quality signmaker scalpel with a precise bubble popper!

JanusWeeder Slim 8.29

The Janus Weeder Slim is a 2-in-1 tool: A bubble-popper and precision knife in one tool.

Flipper KnifePen 8.33

With this knife you can stop the blade at two cutting positions with different cutting lengths, or hide the blade safely in the handle.The Flipper KnifePen is also available as a piercing tool for air bubbles. Blade and needle are of course interchangeable.



MaliCut 2.15

Undercut knife for vehicle films. With the MaliCut you can create invisible undercuts between the driver‘s cab and the loading area in deep gaps in the bodywork, for example on pickups, so that no streaks of the original paint come through.

SignTrim CeraSwitch 12.45

The replaceable ceramic blade of the SignTrim CeraSwitch is ideal for clean deburring of inlays, embossing of milled signs, letters or ornaments. The advantages of ceramic technology are obvious: high cut resistance and a long service life are properties that are also known from other ceramic tools.

YelloCase Blade Set

We have combined the YelloCut Master special sign making knife with all currently available SpareBlades in the YelloCase Blade Set: Whether window tinting, demanding car wrapping work or sign making applications - you will be amazed by their sharpness and precision!

KnifeSet

The set includes the YelloCut PSM and YelloCut HD Pro cutter knives with matching titanium replacement blades, the BodyGuardKnife foil and backing paper cutter with matching Teflon glide feet and blades, the BladeBreaker Pro snap-off blade box and the CutGrip handle aid for a secure grip when cutting.

CuttingMat Crystal, Antistatic and Frosted

- unseamed sizes up to 20 meters long
- self-healing for durability and no-steer cutting
- oil and petrol resistant
- phthalat free
- Made in Germany
- absolute flatness
- usable on both sides
- frosted = low reflection
- frosted = lower surface adhesion (easier removal of adhesive residues)

FingerTip KnifePen 8.24

The „FingerTip KnifePen“ is great for cutting out fine details and doing filigree cutting work. You can also use it as a bubble popper tool.

FingerTip KnifeSwivel 8.25

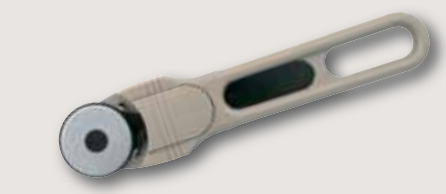
Fingertip knife with rotating blade. The swivel version works in principle like a plotter. With just the movement of your hand, you are now free to cut all shapes, ornaments and letters out of the vinyl.

YelloSwivel Plug

Swivel Knife Aattachment for our multi tool FingerTip KnifeSwivel.

YelloShear Basic / YelloShear Pro 8.43 8.44

Professional stainless scissors with ergonomical soft-grip handle. The YelloShear Pro are available for left-handed as well as for right-handed people. Both scissors are very sharp!



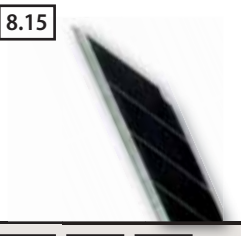
YelloWheel PRO 8.19

Adjustable rotary knife for cutting films and textiles.

CutGrip 8.34

The grip aid for cutter offers you ergonomic comfort at the highest level and makes it much easier to hold the knife. The knife handle is suitable for sign makers who are right-handers as well as for left-handers.

8.15



BlackBlades

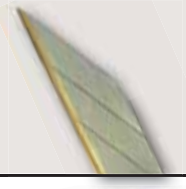
Extremely sharp replacement blades with an high amount of carbon.

8.17 8.18

SpareBlades

Snap-off blades in 9 mm or 18 mm.

8.13 8.14 8.16



TitanBlades

Blades with titanium coating. Perfect cut without any pressure on the knife.

SpareBlades Cera 59°

Extremely sharp ceramic blades for the YelloCut Cera.

7.10

SpareBlades BodyGuardKnife

Replacement blades for our BodyGuard-Knife. Pack of 10.

TitanBlades BodyGuardKnife

Ultra-sharp spare blades with titanium coating. Pack of 10.

8.40

TitanBlades Trapez

Extra sharp replacement blades with titanium coating.

8.41

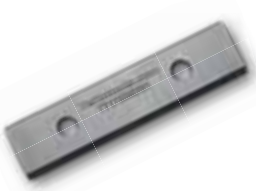
SpareBlade CutCoaster

Replacement blades for the CutCoaster

8.47

TitanBlades AngelCutter

Titanium coated blades for the CutCoaster & AngelCutter.

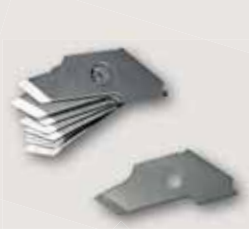


AngelRacer SpareBlades

Spare blades for the AngelRacer made of hardened steel.

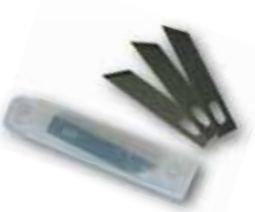
SpareBlades

These spare blades fit on the EasyOrbit Rondo and SensorCut Orbit.



SpareBlades EasyOrbit

Replacement blades for the EasyOrbit.



SpareBlades Weeder 59°

Scalpel Replacement Blades.

8.36

SpareBlades Weeder 30°

Scalpel Replacement Blades.

8.37

SpareBlades Janus SwivelKnife

SpareBlades for Janus SwivelKnife and HeroKnife Swivel.

8.35

SpareBlades CutCoaster Wheel

Spare blades for our CutCoaster Wheel.

8.38

SpareBlades SwivelKnife

Plastic blades for the SasserCut Pro

SpareBlades Wheel

Replacement blades for rotary cutter.

EasyOrbit Rondo 7.15

Vinyl circle cutter without center needle. With this tool you can cut out circles that have a diameter of 2.4 - 15 cm.

SensorCut Orbit 7.16

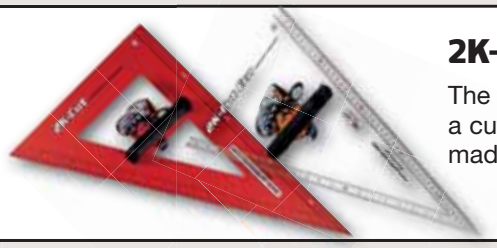
With this tool you can easily perform circle cutting with a minimum diameter of 5 mm and a maximum diameter of 150 mm without a center needle.

FineLine Tape from 1.5

Our FineLine tape is perfect for cutting and lining and wont pull up unless you want it to and when it does, it pulls up clean! It‘s available in various widths too!

SafetyRuler SpareMat

With the fixing tape SafetyRuler SpareMat, the cutting ruler remains in place. The anti-slip tape can be easily attached and also renewed, if needed.



2K-Cut / 2K-Cut Eco 9.26 9.28

The 2-K-Cut is a stainless steel set square, which can also be used as a cutting angle (90°), with a length of about 50 cm. The Eco version is made of acrylic glass to better see the cutting line.

IvoCut 9.29

Cutting rulers for tricky corners and angles.

IvoCut Cam 9.25

Cutting rulers for tricky corners and angles. Transparent version for the full view.

IvoCut X-treme 9.27

Cutting rulers for tricky corners and angles. Sticks perfectly onto glass surfaces.

MittmanRuler

An acrylic cutting ruler with a smart scaling. The ingenious clear cutting ruler makes the cutting jobs in signmaking much easier. Available in different sizes:

640 mm (25.2“), 1290 mm (50.8“), 1580 mm (62.2“).

SQUEEGEES

Yellotools designs and manufactures high quality squeegees for every Sign Maker need. We know the squeegees are „the Signmaker's best friend" and that „the" perfect squeegee is not the same for everyone. It's your individual, personal way of working and technique that shows you what „your" ideal squeegee models are!

ProBasic Family

from 5.4

The 4"-Basic in black, gold, blue, pink, orange, green, peekaboo, teflon, clean and antistatic. The Squeegee is available in all degrees of hardness that you know from Yellotools.

ProWrap Family

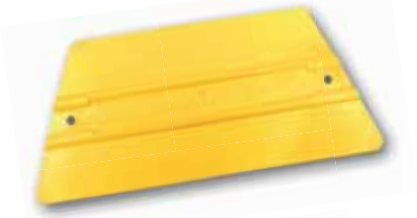
from 4.8

Our allrounder in black, gold, blue, pink, orange, green, peekaboo, teflon, clean and antistatic. The Squeegee is available in all degrees of hardness that you know from Yellotools.

ProWrap Betty S32 / S40 / S65

4.1 4.2 4.3

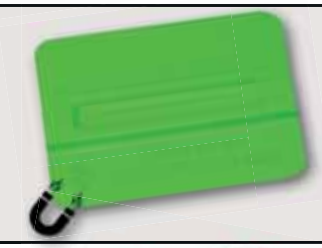
the ultimate "30-degree squeegee" for all car wrapping applications. You will never again have the wrong working angle - only safe and fast applying of your vinyls! In three degrees.



ProWrap Duo Family

from 4.9

The ProWrap Duo is a 4" and 6" squeegee in one tool.The Squeegee is also available in all degrees of hardness.



TonnyMag Family

from 5.6

Magnetic Squeegee. The two, laterally integrated magnets „park" the squeegee on all magnetic surfaces. The TonnyMag is available in different degrees of hardness.

AllStar Family

from 4.7

The ergonomic squeegee with the 30 ° edge. The AllStar squeegee is available in all degrees of hardness.

MagicMaster Family

from 5.3

The 5" Squeegee for signmaker and car wrapper. Available in all degrees of hardness.

ProWrap SmellGood Family

The first scented squeegees in the version Pina Colada,Peppermint, Coffee, Caramel Cupcake and Bubble Gum. Available in 63° Shore.

YelloTwin [from 5.7]

The squeegee insert for our YelloTwin Base. You can put together your own individual squeegee. Available in all degress of hardness.

YelloLip Cutter [7.12]

A BodyGuardKnife cutting shoe as an insert for our popular YelloTwin. Here you can insert the knife into the YelloTwin Base. One side will have any of the squeegee shores you prefer and the other will have the Cutter!

Yel-Lo Plek [4.4] [4.5] [4.6] [5.1]

With the different shore hardnesses and two different cross-section profiles, the Yel-Lo Plek is perfectly usable as a mini-squeegee for applications on narrow or slightly curved areas of the car body, for deeper lying areas such as bumpers or for lifting rubber seals.

Plek Blade [5.2] [5.58] [10.9] [10.11]

The Plek Blade can also be used to lift a wide variety of rubber seals or to work paint protection films into bumper recesses. A small angled notch one one corner can also be used to trim vinyl in certain areas.

ProWrap 360 [5.59] [5.60] [5.61]

The special squeegee with many special features. One feature is the perfect haptics of the handy shape and the different side parts. Thanks to a new injection method, this squeegee is completely usable all around - hence the name 360!

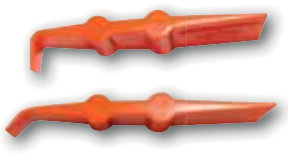
Made in Germany ORIGINAL by Yellotools.com

YelloMaxx Family [from 4.10]

The 6“ squeegee “YelloMaxx” lies comfortably in the hand and distributes the pressure evenly on its outer flanks thanks to its torsion-resistant construction.

YelloMini Family [from 5.5]

The mini squeegee is particularly suitable for all fine work on cars, trucks and motorcycles. Available in all degrees of hardness.



YelloMini „Hang-Loose“ [2.44] [2.45]

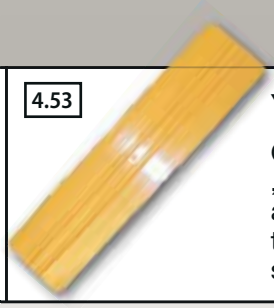
The perfect squeegee to apply vinyl at „undercut areas“, such as tight-fitting headlight frames, body gaps or fender joints!
Available in version with 45° angle and 90° angle.

12.17

SqueegeeRuler

The Squeegee with scale up to 15 cm. Shore 72 D.

4.53



YelloBig 12“

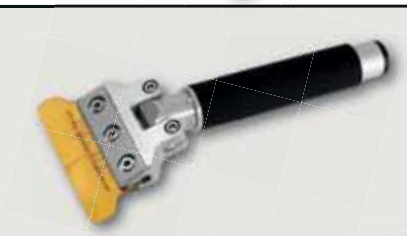
Our 12“ squeegee „YelloBig“ was specially developed by our team for use in large-scale applications.

AllStar Cutter 7.13

The AllStar Cutter - a cutting shoe from the BodyGuardKnife, integrated into our AllStar Gold plastic squeegee. This allows the film to be prepared and directly applied.

APE Duo Green / Red 1.24 1.25

Different edge grinds of 30, 45 and 90 degrees allow different pressure to be applied during squeegeeing. When applying window tinting films, the liquid is optimally worked out of the film, and the pressure can be increased by simply turning the squeegee.



TwinBase Handle / Flexi 5.35 10.7

Squeegee handle for more pressure, flexibility and ergonomics. Available in the version with a 15cm long shaft, a 60cm extension or extendable up to 90cm.

WetMaxx

The squeegee blade specially developed for flat glass applications slides optimally over the film and displaces the bonding liquid without leaving air pockets.

ProWrap Zero

The latest innovation from Yellotools: squeegees made from biodegradable plastic!

YelloStripe MicroFine 6.53 6.54

With the YelloStripe MicroFine, any length can be cut to size, regardless of the squeegee shape. The high-quality microfibre material impresses with an even denser surface structure compared to the Micro fabric. Available in BigBuffer and SlimSkin.

YelloStripe Micro 6.51 6.52

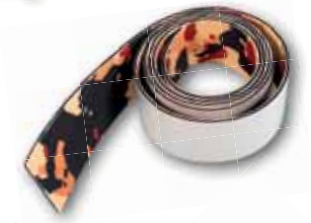
With the YelloStripe MicroFine, any length can be cut to size, regardless of the squeegee shape. The Alcantara-like material of the YelloStripe Micro is particularly well suited for most smooth surfaces. Available in BigBuffer and SlimSkin.

YelloStripe Felt 6.60

With the YelloStripe MicroFine, any length can be cut to size, regardless of the squeegee shape. It is particularly suitable for all coarse-pored surfaces such as FOREX.

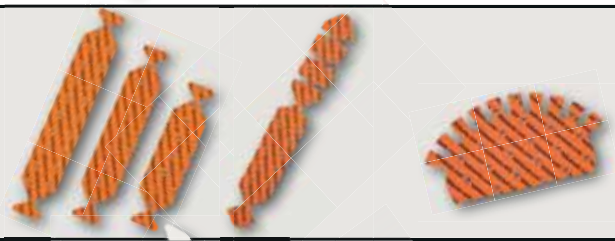
YelloStripe MicroFine PinkLeo 6.55 6.56

With the YelloStripe MicroFine, any length can be cut to size, regardless of the squeegee shape. The high-quality microfibre material impresses with an even denser surface structure compared to the Micro fabric. Available in BigBuffer and SlimSkin.



YelloStripe MicroFine Camo 6.57 6.58

With the YelloStripe MicroFine, any length can be cut to size, regardless of the squeegee shape. The high-quality microfibre material impresses with an even denser surface structure compared to the Micro fabric. Available in BigBuffer and SlimSkin.

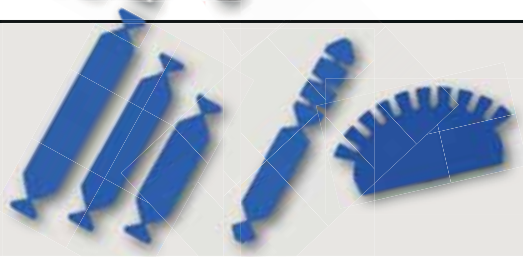


YelloWings MicroFine from 6.5

For finer surface structure for sensitive films. Suitable for wet appication. Available as BigBuffer and SlimSkin.

YelloWings Micro from 6.3

Alcantara-like microfibre fabric, suitable for many smooth surfaces. Thin coating variant. Available as BigBuffer and SlimSkin.



YelloWings Poly from 6.1

The elastic polymer is extremely resilient and very durable. Available as BigBuffer and SlimSkin.

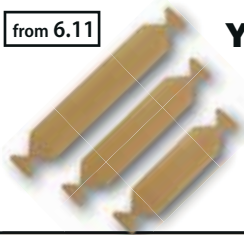
YelloWings MicroFine Camo from 6.9

YelloWings MicroFine in camouflage design. Available as BigBuffer and SlimSkin.

YelloWings MicroFine PinkLeo from 6.7

YelloWings MicroFine in pink leopard design. Available as BigBuffer and SlimSkin.

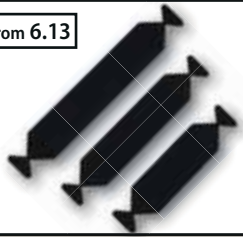
from 6.11



YelloWings Teflon

This wing increases the gliding properties of your squeegee many times over.

from 6.13



YelloWings Felt

Felt cover for all coarse pored surfaces.

YelloFlex / YelloFlex Shape

from 4.48 | 4.52

The thin squeegee with rubber lip is just 2mm thick! Thanks to the rubberized lip (1.6mm thick), it is ideal for “sensitive” vinyls and all uses in signmaking where you have to be extra careful. Available in sizes 3, 4, 6 and 12 inches.

YelloFelt Lip

Replacement felt lips for your YelloFelt Grip. Available in four sizes: 4“(10cm), 5“(12,5cm), 6“(15cm), 12“(30cm).

YelloFelt Grip Family

from 5.53

Felt squeegee with interchangeable replacement felt strips to apply pressure selectively on uneven areas or to squeeze punctured bubbles. All our felt squeegees are of course also perfectly suitable for any wet application.

FeltBloc Family

from 5.49

Solid felt squeegees in different version to apply pressure selectively on uneven areas or to squeeze punctured bubbles. All our felt squeegees are of course also perfectly suitable for any wet application.

WrapStick Set

15 unique specialty tools for tucking, lifting and applying vinyl. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick set Deluxe

15 unique specialty tools for tucking, lifting and applying vinyl in the large YelloCase 20 tool pouch. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

YelloTwin SampleBox 16 pcs.

Our YelloTwin SampleBox includes all Lips in every degree of hardness and the appropriate wings.

YelloWings SampleBox 2.0

Due to a product change of our YelloWings Family we have created a ‚Sample Set‘ for you, if you don‘t know which wing is best suited for your work.

ProWrap Set

The Squeegee Set ProWrap includes all our Squeegees from the ProWrap line. The different colors signify different hardnesses.

30WrapGuide 4.54

With this 30 degree squeegee stencil and the matching, waterproof EasyDot WindowDry, you can quickly and easily draw a „cheat sheet“ on your squeegee.

ProWrap Mini Fun Family

The Fun-Squeegee for your keyring. There hasn not to be serious sense all the time - sometimes „just fun“ is enough :)

Squeegee Dragster 4.55

Small damage to the squeegee surface can be „repaired“ in seconds with this practical little helper. The continuously adjustable knife lifts a few tenths off the squeegee if required.

TimberMaxx 11.3 11.5

The TimberMaxx Series is perfect for window applications / tintings and for all even surfaces! Available in different sizes: 30 cm, 40cm, 50 cm, 60 cm, 70 cm, 80 cm, 90 cm, 100 cm, 120 cm, 140 cm und 165 cm.

TimberMaxx Atis 50/75/100 11.1

XXL squeegee including spirit level and cutting bar. Available in three different sizes:

50 cm, 75 cm and 100 cm.

TimberMaxx Atis Lip 11.2

XXL squeegee including spirit level, cutting edge and rubber lip. Available in three different sizes: 50 cm, 75 cm and 100 cm.

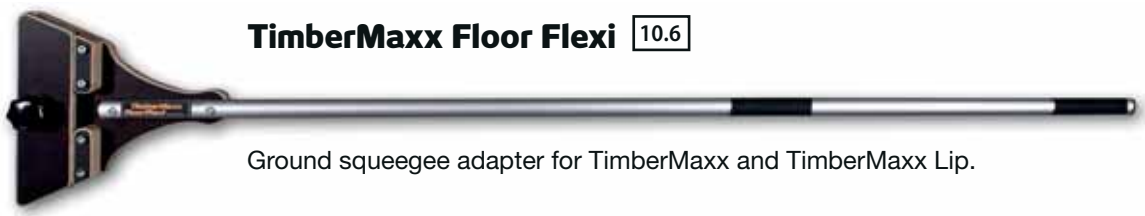
TimberMaxx Lip micro 11.4

Wooden squeegee with flexible rubber lip and microfibre cover. Available in different sizes: 30 cm, 40cm, 50 cm, 60 cm, 70 cm, 80 cm, 90 cm, 100 cm, 120 cm, 140 cm und 165 cm.

TimberMaxx Frost 11.6

The XL squeegee, especially for the bonding of glass decoration foils. Available in four sizes:

20 cm , 25 cm , 30 cm , 40 cm.



TimberMaxx Floor Flexi 10.6

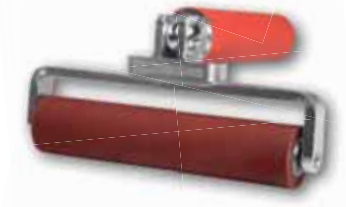
Ground squeegee adapter for TimberMaxx and TimberMaxx Lip.

APPLYING

Applying the print can be very annoying in Sign Making. Good that there are "Yellotools". Because through our close contact with our customers all over the world, we manage to design the best tools for Sign Makers, according to your wishes.

YelloRoller Maxx Family

Two different sizes make it possible to work on larger prints and graphics without much effort and without stressing the joints! The rollers have a shore hardness of 65A and are therefore medium soft. Available as YelloRoller Maxx 30, Maxx 60, Maxx 60 TwinHandle and Maxx 60 Duo.



YelloRoller Flexi Family from 11.8

The High-performance Rollers spare your tendons and muscles with a simple turn on the Handle. If you still like to roll „the old-fashioned" way or in the „Muscle-protect"-Mode is totally up to you: Just turn the Handle. Available in different sizes: 50 mm, 70 mm, 100 mm, 150 mm, 200 mm.

YelloRoller Flexi Extension

These handle extensions are suitable for all YelloRoller Flexi. The YelloRoller Flexi can be adjusted to three different angles of inclination.

YelloRoller Ziggy 11.17

The pressure roller has a large diameter and its weight of approx 700 grams makes the work very effective and energy-saving for you. The rollers are made of rubber and are perfect for gluing, regardless of the flat surface. Thanks to the ergonomic handle, you can work without getting tired.

YelloRoller Plain Family from 11.7

YelloRoller Plain makes it much easier to apply large-format graphics, digital prints and stencil films. Thanks to its sturdy construction and smooth-running, replaceable rollers, this hand roller is the ideal application tool with a long service life and excellent price-performance ratio.

YelloRoller Duo soft/hard

All muscles stay relaxed even at bigger signs and graphics. The moving of the roller is still flexible and pretty direct. The soft roller is suitable for slightly uneven surfaces. he hard roller is perfect for very smooth surfaces. Width: 50 mm and 150 mm.

YelloThin Foam Wheel 10.21

The perfect pressure roller for extremely structured surfaces. The roller is perfect for larger vehicle thicknesses or for wall joints in wall foiling. With a roll width of 13 mm you are well equipped!

YelloRoller Rubber Wheel 11.19

The perfect pressure roller for deep beading (e.g. on car doors) with a round rubber profile. The width of the roller is approx 7 mm.

YelloRoller Eco 11.18

The cheap alternative. Due to its low weight and compact design, it fits in every bag. 10 cm width and 115 g weight.

SignTweezer Set

Tweezers for a quicker, easier and more accurate weeding!

Available in different versions.

SignTweezer Bloc 12.50

Get your SignTweezer Bloc, suitable for our SignTweezer.

It has space for 5 of our various tweezers. So you always have everything in place and easy to handle.

SignTweezer Bloc Set

This is the ultimate add-on to your signmaking tweezers - the TweezerBloc. It holds all our fi ve different Tweezers in a safe and convenient way.

SignTweezer Straight 12.27 12.31

The SignTweezer Straight with their very hard and pointed wingtips were developed for weeding plotted graphics and lettering. These are the right tweezers for demanding signmakers who value good tools.

SignTweezer Hook 12.29 12.30

The SignTweezer Hook was specially developed for enitgrating work in signmaking: With their curved wingtips, these tweezers are the ideal tool for quickly and easily grabbing hallmarks and other cutting and punching debris. Fonts and graphics from plotted textile and vinyl films are weeded in no time.

SignTweezer Edge 12.28

With their very hard, angled wingtips, SignTweezer Edge is the perfect tool for all signmakers to weed textile and plotter films quickly and precisely. Thanks to its special shape, punches and other cutting and punching residues can be gripped quickly and easily.

SignTweezer from 12.32

Two different sizes fit ideally in men‘s and women‘s hands and facilitate handling during weeding. The Yellotools SignTweezer is now available in black or pink

SignTweezer SuperWeeder 12.26

The SignTweezer SuperWeeder makes it much easier to remove punching and cutting residues from plotter and textile films.

YelloHook 12.25

A fine barb on a cranked but highly stable holder. The YelloHook is the ideal tool for lifting and weeding of plotted flex and flock foil.

YelloPen 2.50 12.40

The bubble popper that look like a pen! All YelloPen have interchangeable needles, an ergonomic ballpoint pen shape and a perfect needle guide on the metal shaft.

YelloPen EasyFlip 12.38

This piercing tool is equipped with a patented latching mechanism that holds the tip firmly in position and also allows it to disappear quickly and safely back into the shaft.

YelloPen Mini 2.51 12.41

YelloPen Mini is the little brother of our popular bubble piercing tool YelloPen. The handy pen format allows the YelloPen Mini to be carried conveniently in any pants pocket or tool bag.

FlipperPen 12.39

Retractable Bubble Popper. The extendable function allows larger distances and a greater angle for popping than a standard bubble popper.

EasyWeed Powder 12.24

The all-organic Powder makes the fine contours perfect visible.
It disappears again without leaving any residue.

EasyWeed Ring 12.23

The large plate for holding punches and other film scraps can be comfortably carried on each finger of the hand with its adjustable Velcro fastener and kept within reach of the tweezers or weed needle. Exchangeable pad!

PrintJoggle 9.1 9.3

Press the inside corners of the PrintJoggle against the sign corner and guide the corners of the print under the plexiglass panes of the joggle. The printed scale now shows exactly the position of the outer edge of the sign.

PlottJoggle 9.2

The ingenious alignment aid for plotter graphics! Adjust once - never measure again.

HeavyHolder 8.54

Specially balanced weights with felt and grip rubbers for „accordion bonding“ on signs. The HeavyHolder is 30cm long and about 2.6kg in weight.

YelloApplication Set

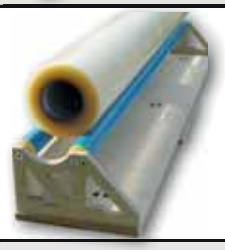
In this application set we have packed all the tools you need for perfect and easy application!

Window Graphic Application Set

With our genius tool combination you can apply even large graphics to all windows.

Appfix

The perfect application aid with stop nozzle. Available from 70cm to 160cm. Ball-bearing mounted rollers for ultra-smooth delivery. Includes fastening brackets.

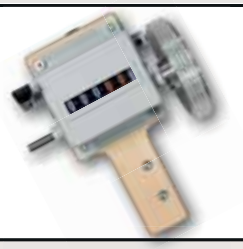


Appfix 140 Flexi

This ingenious aid can be turned on a special fitting so that you can turn the film straight towards you, pull it out to the desired length and apply it conveniently. The result: a stable construction that can be rotated 360 ° and becomes an absolute all-rounder.

Appfix Roll ‘N’ Cut

Proven Yellotools unwinding technology extended by the functions cutting and measuring. Available in three different sizes!



Appfix Counter

You would like to know how many meters of foil you have already unrolled from your roll? You can do this with our foil counter AppfixCounter. It can be attached to all new Appfix or Appfix Flexi models. The 5-digit analog display (cm) promises highest accuracy.

Appfix Racer 1x2 m

Our Appfix Racer is a great addition to your work table. The track system mounts right to your existing table and our bridge mount makes application quick and easy. Our TimberMaxx (wooden squeegee) works great in tandem with the Appfix Racer and is sold seperately

The Size of this Appfix Racer covers 4/5ft width by 6-10ft length

LABELING

Labeling and Car Wrapping problems are a thing of the past with Sign Making Tools from Yellotools. If, for example, you get annoyed with the rivets during the foiling of vehicles or Sign Making Signs, you'll love our YelloDouble Pen and the YelloBrush.

EdgeWrap Cutter 10.17

Template for sign and furniture corners to wrap vinyl seamlessly over edges, either overlapping (with a 45 ° single wing) or exactly edge to edge.

APE CornerTool 10.16

Multifunctional tool for various furniture foil applications. The two angles (90° and 45°) and the two radii (3 mm and 6 mm) on the outside of the CornerTool can be used as a perfect template.

EasyScore 9.22

With the EasyScore you can cut half-circles in 20, 30, 40, 50, 75 and 100mm easily.

IvoCut 9.29

A Ruler with a handle and various radii, for no wasting of silicon or window putty.

IvoCut Cam 9.25

A Ruler with a handle and various radii, for no wasting of silicon or window putty. Transparent version for the full view.

IvoCut X-treme 9.27

A Ruler with a handle and various radii, for no wasting of silicon or window putty. Sticks perfectly onto glass surfaces.

Hole n' Cut Eco / XXL Eco 9.5 9.6

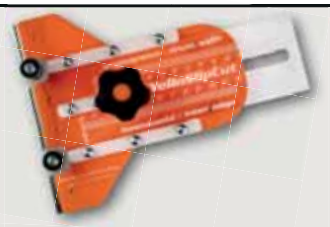
The Hole ‚n' Cut XXL Eco offers the possibility to measure drill holes and edge cuts up to 80 mm distance, twice as much as its predecessors. The tool is made of cast, transparent acrylic glass and therefore offers a perfect view of the workpiece.

Hole n' Cut XXL Eco Set

Hole ‚n' Cut XXL Eco - the ultimate template with the 2-in-1 feature. Available as set incl. knife and deep hole marker in suitcases!

Hole n' Cut 9.7

Drill hole and edge cut template in one tool. A scale from 15mm to 40mm will help you to either make a straight cut or drill holes at an even distance.



YelloSlip Cut Set 9.4

The edge cutter for foils on panes, on window seals or on sign materials, with which you can set the edge cut from 0 - 125 mm, press the guide bolts into, for example, a pane frame or pull them along the outside of a sign material.

EvoCut BUR 9.12 9.13 9.14

These contour templates provide fast and perfect processing of the most diverse requirements on vehicles, on signs and for all freehand work.

EvoCut R 9.18 9.19

The RE and RU circular templates are suitable for all non-exposed add-on parts such as windscreen wiper feet whose arm cannot be dismantled: Here the radius is trimmed „on the outside“ by placing the template on the corresponding part.

EvoCut C 9.16 9.17

With the CE and CU round templates from the EvoCut series, car foils can be precisely recut in the area of external parts such as door locks, antenna bases or windscreen wiper sockets.

EvoCut SQ 9.20 9.21 9.23 9.24

The EvoCut SQ allows precise trimming of right angles with radii; four different variants are available.

EvoCut Set

11 different shapes secure a safe and fast Work at Vehicles, Signs or any „free-hand-application“.

EasyEdge Flexi

the sturdy EasyEdge Flexi hand punch easily rounds corners of Dibond (up to ca. 6 mm), Forex or polystyrene panels.

YelloDistance Check

The YelloDistance Check is a quick and easy way to measure all kinds of spaces and distances. It provides precise measurement capabilities with laser light for exact determination of lengths, areas and volumes - ideal for measuring room sizes and calculating material quantities.

SpeedMag HD 3.7

Powerful Magnet - Allows transfer work unassisted.

FlatMag HD 3.8

Powerful Magnet with a lower profile pull-out solution.

Gene-ius Mag HD 3.9

Powerful magnet with a lower ergonomic pull-out profile.

BigMag HD 3.2

XL Holding Magnet - Strong magnet for large digital prints.

LongMag HD 3.6

Strong holding magnet with 15 cm long handle.

MagPatch 40 | 66 | 88 3.3 3.4

Microfine Patch for our magnets, the perfect protection for your films and paints. Three different sizes: 40 mm, 66 mm und 88 mm.

APE MagCarpet 2.17 3.5

Special magnet for curves on the vehicle with eight strong magnets!

GeckoPatch Power from 2.5

The Gecko Patch Power offers extreme adhesive force on non-magnetic surfaces such as glass panes. 3 times the adhesive force thanks to 1 mm thick sheet metal.

Product features:

- self-adhesive on all smooth surfaces
- reusable
- easy to clean

GeckoPatch [from 2.1]

Make non-magnetic surfaces like windows, fiberglass assemblies, aluminum hoods or plastic doors „magnetic“. Press our GeckoPatch on and continue to use your magnets as usual.

Our sizes S, M and L are especially suitable for smooth surfaces, whereas the GeckoPatch Flexi can be used „around the corner“.

EasyOrbit

Cutting perfect circles from 0.39“ to 5.91“ in diameter is fast and easy, thanks to EasyOrbit. Cover rivets, nails and screws professionally, or even just dot the „i“ in seconds and without loading vinyl in the plotter.

JoniMag Strip [2.12] [3.1]

The magnetic chain holds with either 3, 4 or 6 strong, rubberized holding magnets on each vehicle which is of course magnetic. Available in three differenz sizes: JoniMag 3 with three magnets, JoniMag 4 with four magnets and JoniMag 6 with six magnets.

BlackMamba [2.13]

Our „Black Mamba“ is a flexible magnetic chain for large hinge connections and a super flexible „free hand radius ruler“! Available in four different lengths: 26 cm, 44 cm, 68 cm and 98 cm.

EasyApply Fluid to go [3.23]

Yellotools EasyApply-Fluid is a technical liquid that leaves no lime marks and evaporates quickly. It can be used, for example, to properly align and then apply plotter films in a period of up to 30 minutes.

AntiStatic Fluid [3.20] [3.21]

Our antistatic special cleaners are highly effective long-term antistatic agents in liquid form that are applied directly to the panel material. The attraction of dust and dirt caused by electrostatic charging as well as pressure impairments are effectively prevented by using our AntiStatic Fluid.

BoostBox Bucket

The forced ventilation system simply sucks heavy solvent fumes from the surface and removes them from the fresh print.

You can either transport the air directly into your rooms (which is not recommended ...!) Or use a standard exhaust hose to transport it outside.

Dimension:

- 44 cm x 50 cm x 50 cm
- divisible into 1, 2 or 4 compartments

X-treme Mat

The X-treme Mats offer a wide range of application possibilities. Their unique capillary action allows films, plates and even entire tools to adhere to smooth surfaces and be removed again without leaving any residue.

GlasPad X-treme

The GlasPad X-treme patches work almost like magnets on glass. Due to their unique capillary action, they are self-adhesive.

YelloBrush | YelloBrush Needle 12.43

Rivet brush and bubble popper tool for optimal pressing of foils and rivets.

YelloBrush Basic 12.42

For optimal pressing of the film on rivets or difficult surfaces.

AngelCutter 8.20

Edge Trimmer for thin cuts on the edge of your sign, usable on both sides. Adjustable cutting widths 0.5mm, 1.0mm, 1.5mm. The blades are exchangeable.

YelloPen 12.40

The bubble popper that look like a pen! All YelloPen have interchangeable needles, an ergonomic ballpoint pen shape and a perfect needle guide on the metal shaft.

PrintEx Pen

Thanks to its special formula, you can remove ink stains or fix other minor errors in your digital print in no time at all.

EasyOrbit Rondo 7.15

Our EasyOrbit Rondo was developed especially for signmakers and vehicle wrappers who frequently cut out circular shapes from plotter films or car wrapping films.

The infinitely adjustable mechanism enables perfect circular cuts with a diameter of 2.4 to 15 cm.

SensorCut Orbit 7.16

With this tool you can easily perform circle cutting with a minimum diameter of 5 mm and a maximum diameter of 150 mm without a center needle.

Product features:

- circle cutter for diameters from 5 to 150 mm
- without center needle
- practical pre-control
- stepless adjustment
- spare blades (separately available)

WallRoller „Hot“

Our WallRoller „Hot“ is perfectly suited for the application of wall and floor graphics. It has a quick-release fastener for holding the WrapGun I and II, which allows the heat gun to be plugged in quickly and easily.

WallRoller „Hot“ Set II

The WallRoller „Hot“ is perfect for applying wall and floor graphics by using heat: The sturdy, welded steel frame provides a secure hold even for large decorations and wall tattoos. In addition, the WallRoller „Hot“ is also used as a floor roller for installing floor graphics.

WallRoller „Handy“ 10.18

With this handy installation tool, signmakers and car wrappers are ideally equipped for a wide range of jobs: be it decorations, advertising lettering, wall tattoos or vehicle wrapping. Due to its 2-roller-technique, it offers perfect ergonomics and force distribution for fatigue-free working.

WallRoller „Handy Mono“ 10.19

Versatile application roller for signmakers and vehicle wrappers.

WallRoller „Chrissi“ 10.20

Our WallRoller Basic was designed for cold application of heat-sensitive materials such as PVC-based, self-adhesive films.With this versatile application tool, any sign maker is well equipped for a variety of jobs; whether large decorations, wall tattoos or floor graphics

WallRoller „Basic 10.22

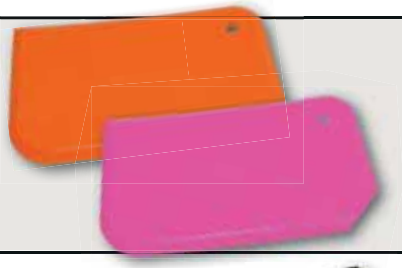
The WallRoller „Basic“ was designed for cold installation of heat-sensitive materials such as PVC-based, self-adhesive films.

SpareRolls

Replacement rollers for your StreetRollers and WallRollers.

REMOVAL

Tools for removing prints, graphics, and vinyl.



YelloBlade Orange / Pink 10.8 10.10

The quick and effective vinyl removal tool that is safe for all surfaces! It's super cheap, easy to grip and fits easily in your pocket / tool belt!

YelloBlade Handle 10.1

The ergonomic handle with integrated magnet for our YelloBlade!

YelloBlade Egg 10.4

The small egg-shaped, palm-sized handle for our YelloBlade!

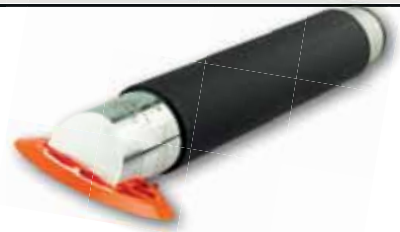
YelloBlade Grip / Set 10.12

The YelloBlade and a premium rubber profile in a set.

The premium rubber profile for our YelloBlade to protect you from any blisters.

YelloBlade 360 10.5

The advantage of the round shape is that a circular blade slides under the film more easily, making it easier to start film removal.



YelloBlade Handle 360 10.2

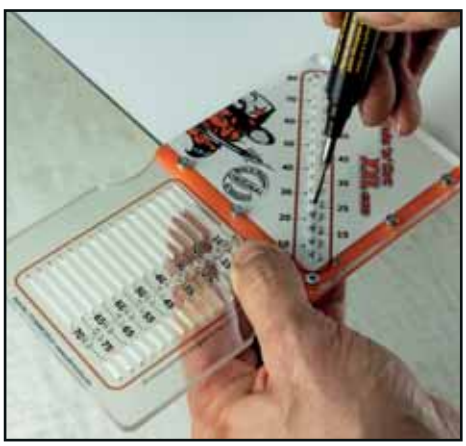
The foil removal tool YelloBlade Handle 360 now contains the YelloBlade 360 in a round shape and also does not leave any scratches or damage. The corresponding handle fits ergonomically perfectly in the hand.

PlateLine Remover Black 2.19

The PlateLine Remover black makes removing company logos and name tags even easier thanks to its largely ergonomic shape.

RapidRemover 10.3

Vinyl Remover - Due to the synchron movements and the intelligent tube system, we combine the solid grid of the material with the strong leverage of the ratchet.



MOUNTING

In advertising technology, the assembly of advertising signs and banners is a daily task. We at Yellotools take this as an opportunity to make the construction as easy as possible for sign makers. That is why our team has developed many useful assembly aids and tools for measuring and aligning for you.

FlatSignScale 12.19

The materials used for the FlatSignScale enable it to be laid flat on a sign or vehicle. The surface can be written on and dry-wiped. A pencil sharpener and another labeling field are also integrated.

FixxSignScale 12.20

Self extending steel measuring tape - The super flat steel tape lies absolutely flat and stays straight even at one meter without tipping over.

YelloDistance Check

Precise measurement with laser light for exact determination of lengths. The area and volume function allows the acquisition of room sizes e.g. for the calculation of material quantities. 3 measuring levels switchable: front, rear and pin.

WindowWizard 12.1

Self-adhesive ruler for the inside of a car or shop window pane.

YelloMeter Family from 12.2

Tailor-made, innovative scale system in five different base materials, each with three different scales.

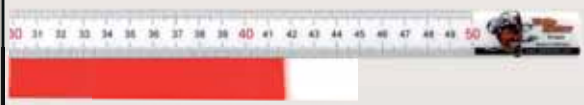
YelloMeter Flex

Flexible measuring tape 150 cm „S“ regular“ scaling with the zero at the left end.

YelloMeter Clear

Transparent measuring tape 15 cm „S“ regular“ scaling with the zero at the left end.

YelloMeter Gecko



Self adhesive measuring tape 15 cm „S“ regular“ scaling with the zero at the left end.

YelloMeter Mag

Magnetic measuring tape 15 cm „S“ regular“ scaling with the zero at the left end

YelloMeter White

Tape measure for signmakers 15 cm „S“ regular“ scaling with the zero at the left end

MagTape Ruler 12.21

Magnetic measuring tape for all non-magnetic surfaces.

MagTape Ruler Power 12.22

Magnetic measuring tape with extreme adhesive power on non-magnetic surfaces in three sizes.

EasyNooks

The EasyNooks e.g. - two 90 degree angle brackets made of steel, finished with our X-treme mat - they adhere perfectly to the inside of the frame on the right and left and you can simplify the measurement of the area with our YelloDistanceCheck laser rangefinder.

SignLevel ALS 9.10

The perfect tool to customize your sign. Attaching it becomes so much easier. It has an analog level board to make aligning signs easier!

SignSetter ALS DUO 8.46

Attach signs easily - and correctly - with the „SignSetter ALS“ single! It has an analog display to make aligning signs easier!

P-Glas Twin 8.21

Cut and deburr acrylic or plexiglass in one tool.

P-Glas Jig

Jigsaw blade for processing acrylics.

P-Glas Twin Set

Whether measuring, marking, scribing, „cutting“ or deburring ... With our set you are perfectly equipped and you will not lack anything when it comes to your use on plexiglass / acrylic glass.

P-Glas Drill

The drill heads of our P-Glas Drills, which are specially ground for those materials, prevent the material from cracking due to their optimized cutting geometry and enable clean hole drilling in cast and extruded materials.

P-Glass Refiner

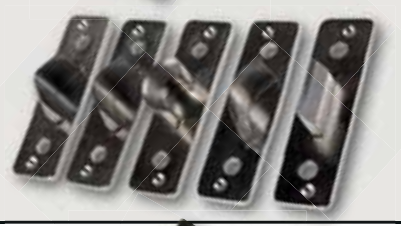
The P-Glass Refiner is a small hand-held gas burner with a variable spacer, which can be adapted individually to the respective acrylic glass thickness.

EasyPress

Attach banner eyelets quickly and easily.

EasyEdge

A tool that punches through panels, laminate, paper and more! It's being delivered without the blade!



EasyEdge Corner

The specially hardened punching knives are extremely robust and can be easily exchanged. Effortless punching in rigid foam and aluminum composite panels (Dibond), PVC, laminate, paper and much more. Available in different versions.

EasyEdge Flexi

The stable hand punch effortlessly rounds corners of Dibond, Forex or Polysterol. Available in two different variants: R6 or R10.

BluePlasticPads

The corner rounders EasyEdge and EasyEdge Flexi require the BluePlasticPads as buffer material during the punching process. Due to their resistant plastic material, these pads are repeatedly usable.

EasyEdge Bracket

Our EasyEdge Bracket is a straight stop bracket, suitable for our corner rounder EasyEdge.

P-Glas CeramicBlade

Ceramic blade for P-Glas Twin and V-Trim.

SignTrim SpareBlades

SpareBlades for SignTrim Big and SignTrim Mini

P-Glas SteelBlade

Steel replacement blade for P-Glas Twin

SignTrim CeraBlades

Ceramic replacement blades for deburrer

BannerFix HD

A 60 cm long banner holder that can be attached to almost anything with the included suction cup!

BannerWing Clear

The sturdy BannerWings reinforce the banner corners and allow secure rope attachment of the advertising medium. The transparent banner wings can be glued to the banner‘s top, bottom or side edges or even at right angles to its corners.

BannerBone Classic

BannerBones Classic are self-adhesive wrap-around wings made of high-quality polymer, which allow you to prepare advertising banners in seconds for weatherproof attachment to facades and open spaces.

BannerPuncher

If you want to do this a bit more safely, quickly and more accurately, we recommend our handy BannerPuncher. It punches an 8mm (0.2“) hole in your banner in about a second.

BannerBoost Tape Clear

The tape can be perforated at will and is perfectly suited to install banners, prints, posters, papers etc. directly and ready for display. Any number of reinforcing strips can be attached until the 32 m long roll is used up.

YelloGrommets Chrom / Messing

Even cutting eyelets for Easypress in brass and chrom.
Diameter: 11mm.

EasyUp HD

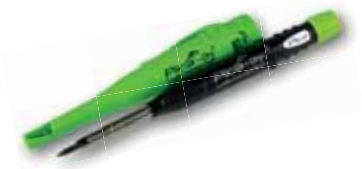
Suction lifter for carrying Dibond or heavy boards.

SignPad Set HD

Fast mounting, holds on to all smooth surfaces, high capacity - up tp 20kg (44lb) per „Pad“, weatherproof and universally usable.

Yello V-Trim 12.48

The V-shaped trimmer effortlessly deburrs steel, aluminium, copper, brass, etc. up to a thickness of 10 mm on both sides in a single operation. The durable blade is of course interchangeable.



EasyDot HD Dry 10.15

The marker for deeper holes, or thicker sign materials.

EasyDot HD Ink 10.14

The EasyDot fits and makes marking your mounting points a lot easier.

EasyDot HD Dry refills

Exchangeable dry refills for the EasyDot HD Dry in a pack of 10.

AngelRacer 12.49

Trim protruding foils and deburr sign edges in one step. The edge width can be influenced depending on the angle of incidence of the cutting surface. The hardened blade is both adjustable and replaceable. Ideal for aluminum composite, acrylic and rigid foam panels.

SignTrim Big 12.46

SignTrim Big makes deburring sign edges quick and easy; the tool's length and diameter are perfectly matched to lift a small homogeneous chip from soft materials like aluminum composite.

SignTrim Mini 12.47

Deburring tool for sign edges - suitable for left- and right-handers.

SignTrim CeraSwitch 12.44

Easy cutting and deburring with ceramic technology.

SignTrim CeraFlex 12.45

Deburring sign edges with ceramic technology

SignTrim Set

The SignTrim Set is our complete solution for signmakers. It contains all deburring tools of the popular SignTrim series, including spare blades, in a handy case made of transparent plastic.

PowerPunch

A modular punch system, where you can insert your special tool such as the corner cutter, the hole puncher, the button pin press or the grommet press. Due to the high-end materials an the clever engineering, you turn your arm power into MORE THAN 4 TONS of pressing power! The PowerPunch System is totally made in our shop in Windeck, so it's more than correct to consider it "Made in Germany".

- **More than four tons of pressure**
- **Cuts aluminum, brass, copper and even STEEL**
- **Four different radiuses: 8, 12, 16 and 25 mm**

You can choose from these options to customize your Power-Punch Base:

- PowerPunch Corner 4
- PowerPunch Corner R3035
- PowePunch Corner R40
- PowerPunch Hole
- PowerPunch Hole Exchange

PowerPunch Corner 4

The sturdy PowerPunch Corner 4 corner rounding tool punches four different radii at once with just one insert plate: 8, 12, 16 and 25 mm.

PowerPunch Corner R3035

This sturdy corner rounding tool punches two different radii (30 and 35 mm) with a punching force of more than four tons with only one insert plate! Punching aluminum, brass, copper or steel is no problem with this punch.

PowerPunch Corner R40

This insert for the PowerPunch Base cuts a 40 mm radius with a force of more than 4 tons - ideal for processing signs made of aluminum, brass, copper or steel.

PowerPunch Hole

PowerPunch Hole can punch a hole in aluminum, copper or aluminum checker plate, in up to 4 mm Dibond, 1.5 mm brass and other materials. Maximum height of the material is 5 mm.

EasyDrill Mini

EasyDrill Mini drill jigs are made of hardened tool steel and make it possible to drill holes professionally and with absolute precision to the milimeter. The base plate can be mounted under any pillar drilling machine or placed individually on a panel. The drill bush set includes four different sizes.

PowerPunch Hole Exchange

If you already own the PowerPunch Hole 4 insert with 4 mm diameter for your PowerPunch Base and need to punch additional holes with 6, 8 or 10 mm... then PowerPunch Hole Exchange is just the right thing: you can purchase missing hole sizes at any time without having to buy the complete module!

STORAGE

Vinyl rolls are often not stored properly. You should change that to protect your slides and work faster. With the right storage system for vinyl rolls you have the right roll always within reach.

Vertigo-System

The probably most innovative and flexible film storage system for sign-makers and digital printers! Whatever you want to store - no matter the weight, the length, the height & how far from each other:

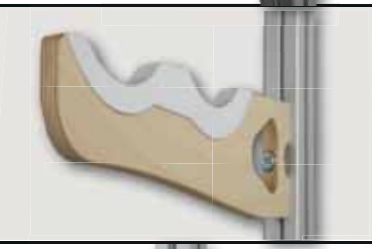
Vertigo is made out of “system bars” and movable “brackets” to store your foils on. Brackets have different “abilities” according to how you want to store your films.

V-Bracket Tube

Easy as pie storing and taking out films with our standard-bracket.

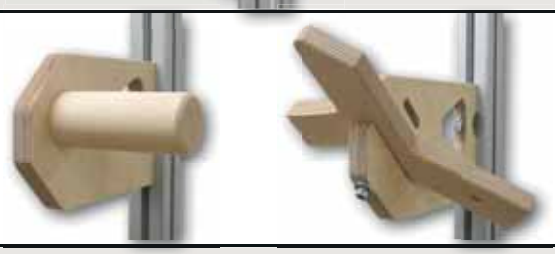
V-Bracket Roll n’ Cut

Put the dispenser on every desired position with this bracket.



V-Bracket WaveHolder

No pressure marks on film rolls due to integral foam inserts.



V-Bracket EasyReach

Easy as pie storing and taking out vinyl of even long and heavy rolls. Stepless adjustable.

A-Tubes

Aluminum storage tube for use with the TreeMaxx, CosyRack and Vertigo System.

A-Tube Stopper

Stoppers for foil roll holders Aluminium bars. Makes roll-shifting impossible.

CosyRack EasyReach

It is a vinyl storage system you can put together individual.

You can combine the Racks also with the neat TreeMaxx MultiPlug - so you can store Rolls of different Lengths in just one CosyRack as well! How cool to have a modular concept!

CosyRack Tube

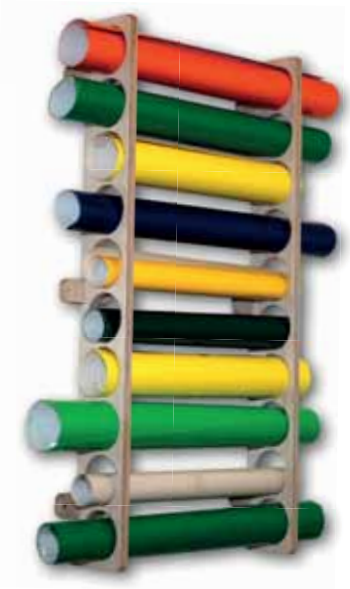
It is available in varying width and adjustable in height, low priced and a great opportunity to archive your articles.

The very stable glued wood construction holds a load up to 200kg (440lb). Same as with the other racks you can decide if you want to purchase a whole System with included aluminium tubes or simply the laterals with holders.

VertiGo Mobil Stepless

A storage rack with 110cm (3.6 feet) length! Holds up to 15 rolls!

The VertigoMobil combines the positive characteristics of our mobile film rack TREEMAXX with the flexibility of the VertigoRack system - i.e. the adjustability of the distances between film to film. So this rack is also ready to store each film roll perfectly and space-saving. The VertiGo Mobile is available in three versions: 110cm, 140cm and 165cm



YelloSpare Brackets

For coreless spare vinyls

The YelloSpare Brackets are pretty versatile, since you can mount them either upright on any wall or even flat underneath your worktable.

YelloSpare Rack

YelloSpare Racks are designed to host eight coreless filmrolls and work awesome as a wallmounted racks. However you want to store them - on the wall, rollable on the floor, under your table - we have the right device for you.

TwisterStripe Wall

Foil storage on the wall - Whether horizontal or vertical, just decide for yourself!

TwisterWallmount

Store up to 9 rolls (max length: 600mm) easy, safe and comfortable on your wall. Every cross “carries” up to 20lbs.

Size: L=550mm * W= 550mm * H= 260mm.

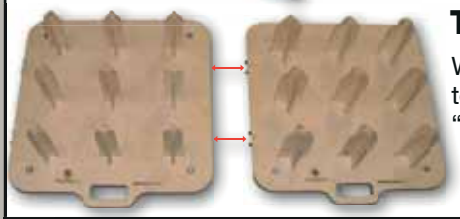
Twister

Make an end to domino effect in your foil stock. Our Twisters keep your rolls upright and neat next to the plotter. Available in 4 versions for 3” and 2” film roll cores. Size: L=550 x W=550 x H260mm. 11,2lbs. “Carries” up to 400lbs.

TwisterMaxi 16

The “big one” of Twisters. Stores up to 16 film rools in different widths. With 5 high-performance castors. Base plate: 720 x 720 mm

Weight: 19lbs. “Carries” up to 500lbs.



TwisterClick

With its patented connection system you can easily click your Twisters together to a “Twister-train” Size: W=550 x L=550 x H=260mm. “Carries” up to 400lbs.

TwisterRondo

First round Twister. For 12 rolls of 2” OR 3” cores. Size: diameter 635mm x 635mm H= 260mm. “Carries” up to 400lbs.

TwisterMagnum

Stores 12 vinyl rolls. On castors. 360°rotation plate. Size: L=660mm x W=660mm x H=300mm. “Carries” up to 400lbs.

Twister Single

This little transport dolly in 2“ and 3” was built to roll your heavy media right toyour “Turnstation”.

TwisterStripe Floor

Slim solution for film storage. The rollable Floor rack comes with our high-performance swivel casters „made in Germany“.

Twister Package

Attractive set for 2” OR 3” rolls, including fitting MediaCards (9x) & SpeedClips (9x SpeedClip & 9x SpeedClip XXL).

TwisterMixx

While we had just only Twisters for 3 Inch Cores OR 2 Inch Cores, some customers complained because they wanted to have a Mix. This is done with two new Twisters: TwisterMixx 5342 (5 times 3” and 4 times 2”) and Twister 5243 (5 times 2” and 4 times 3”).

Twister VEGO Bracket

With the Twister VEGO Bracket you can store 18 film rolls on only 0.3 square meters of space! Available in two sizes: for 2“ film cores & 3“ film cores.

Treemaxx MultiPlug

Makes storing of rolls 300mm shorter than maximum rolls possible.

YelloBoard Rack

A double-sided version (available with or without casters) as well as a space-saving single-sided wallmounted version. Both models are extendable to any desired length and, due to the patented quick release fasteners, shipping is pretty inexpensive as well.

The basic model is 190cm (74.8“) wide, and can easily store sheets up to 300cm (10ft.) in length.

YelloSpare

This clever construction allows you to store up to 28 coreless vinyls in any possible way.

It´s up to you, if you want to tore your precious mish-mash at your Shopwall (WALL), fixed on the shopfloor (BOX) or even as a flexible cart (DOLLY).

YelloMonkey 6er/12er

The simple to mount wooden brackets “grab” prints with a little wooden sphere and keep them safe while drying, outgassing or simply “parking”. Available is our “print/foil-monkey” For 6 or 12 prints.

TwisterCliffhanger 3“

The „Mammoth-Rack“ among the Twister-Family.

Stand-alone allows the Cliffhanger storeing up to 48 Rolls (max. 60cm). Of course - it´s a modular System. So, you can place them right next to each other.

Due to this, you are able to build an almost endless Vinyl-warehouse.

TwisterBloc 3“

This rollable “Upright-Twister” carries a total of 48 Rolls,up to 63 cm (24.8”) at narrowest room.

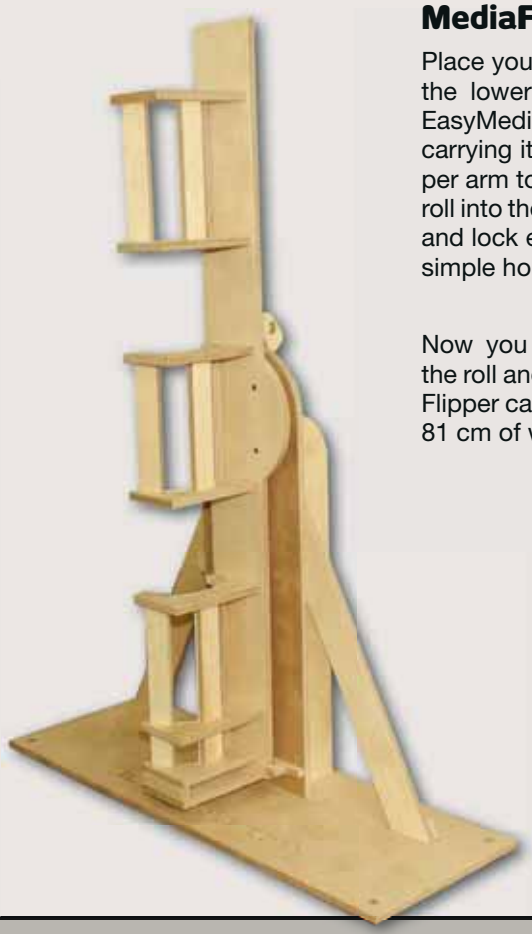
Equipped with Stop-Casters „Made in Germany“, it brings perfect visual control to your vinyl stock.

Available for 3“ cores. Holds up to 400 kg (881 lbs).

EasyMedia Lift

Adhesive film roll lifter for effortless work.

The extremely sturdy stainless steel plate lifts even the heaviest film rolls, and the lightweight aluminum handle ensures perfect ergonomics and leverage.



MediaFlipper

Place your film roll upright on the lower holding plate (our EasyMedia Lift will help you carrying it). Now turn the flipper arm together with the film roll into the horizontal position and lock everything using the simple holding mechanism.

Now you can easily remove the roll and process it. MediaFlipper can flip rolls with up to 81 cm of width.

Treemaxx EasyReach

One-man operation due to special lifting technology. Installed meter counter helps you to cut films exactly to the desired length.

- Stores up to 14 rolls
- Rigid stand
- Holds up to 400 kg (881 lbs)
- Made in Germany

TreeMaxx EasyReach Pro

With our all-new closure technology, ´s pretty simple to reach your media rolls. Just grab the Rolls in the middle – lift them up and done!

The same if you want to restore them again: Just place the core in the left-hand wood-pin and easy slip it in the right-hand Flip-Bracket! That´s it!

Holds up to 400 kg (881 lbs).

SpeedTimber Rack

Dimensions: 105cm x 60cm x 190cm (L x W x H)

Space for 42 rolls// 20 rolls up to 60cm/23,62“ and 22 rolls up to 120cm/47,24“ (15 kg). Maximum load capacity of 250 kg-

TreeMaxx Tube

This is our “BigBoy” with easy rolling storage of up to 15 Rolls of media up to 5.2 feet wide!

The heavy-duty construction of dense Birch Multiplex material, one of the hardest hardwoods, makes TreeMaxx as tough as it is good-looking.

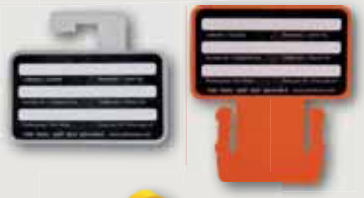
TreeMaxx comes in 4 ready to assemble sizes and is fully A-Tube compatible.

- Affordable and space efficient
- Super easy assembly
- Diverse storage options
- Glued-and-screwed construction
- Holds up to 400 kg (881 lbs)

TwisterTable

A twister for under the table.

Maximum capacity: 16 Rolls in 60cm (24”). Holds up to 160 kg (353 lbs). 2” core version available as well.



MediaCards 2“/3“/Hook

3.13 3.14 3.15

Take control of the rolls in your shop with our new MediaCards, available for 2- or 3-inch rolls, with large easy-to-read spaces for a variety of useful and time-saving information.

SpeedClip 2.0 (single)

3.10 3.11

The clips that hold your vinyl rolls in place without leaving marks or paint residue on the product! Holds rolls up to 50 meters (164 feet) in length! L or XXL.

SpeedClip 2.0 (50er Pack)

Foil roll holder 50 pieces in a bag - optionally L or XL.

SpeedClip PINK single / 50er Pack

The clips in pink version that hold your vinyl rolls in place without leaving marks or paint residue on the product! Holds rolls up to 50 meters (164 feet) in length! L or XXL.

SpeedPatches

Perfect Protection of your medias. For retrofitting our proven speed clips.

MediaMeter Star

3.12

Just plug the unit in a core of a vinyl roll and read on the scale how much vinyl is still left on the roll. It‘s really that easy. The best part of our improved MediaMeter Star is, that you now can easily put together your individual scale-set online.

MediaLid

3.16

A solid 3“ lid with an eraseable or changeable sticker and a handy parking magnet.

Lean MediaMag

The heavy-duty magnets holds this genius “park-assistant” right where you need it. The Lean MediaMag offers space for three MediaCards.

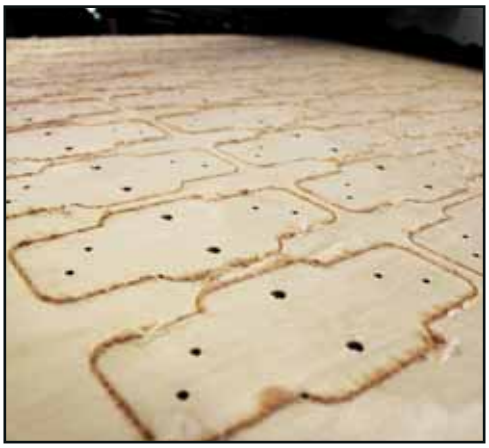
FELDER



CLEANING

In our Sign Making Shop we offer you the best detergents for Car Wrapping, even for antistatic cleaning. Because vinyls or digital prints on your car or an advertising sign will adhere dependably only on a clean, grease-free surface.

PowerCleaner 6“

The space-age, high-tack cleaning roller made off steel, that removes static and dust. Power Cleaner 6“ in aluminum or plastic.

PowerCleaner 12“

The space-age, high-tack cleaning roller made off steel, that removes static and dust. Power Cleaner 12“ in aluminum or plastic.

PowerCleaner Pad

Cleaning Pads for our PowerCleaner.

PowerCleaner Pad Holder

The high-efficient „Park-Bracket“ for Pad´s and Rollers. That´s how you store your PowerCleaner efficient, clean and professional!

YelloDusty

Removes dust more cleanly than any other wipe. Yello Dusty is ideal for digital printing, vinyl graphics, vehicle vinyl/paint preparation – and even cleaning your computer monitor!

Yellowipe Air

„Yellowipe Air“ soaks up twice as much water as usual toweletts, because of its special structure!

YelloFleece Pro

Extremely wet- and tear-resistant cellulose cloths. 60 cloths in dispenser.

YelloQuickStick 2.53

Check the surface tension of car paints and signs very fast.

AntiStatic Fluid / Set 3.20 3.21 3.24 3.25

Our special anti-static cleaners AntiStatic Fluid C (Cleaner) and E (Cleaner with ethanol content) are highly effective, long-term anti-static cleaning products which are applied directly to the sheet material.

GeckoClean 3.26

With the GeckoClean cleaning agent, your X-treme Mats can be cleaned quickly and easily: Spray on, wipe off with a clean cloth, and the adhesive effect is back like on day one.

YelloOrange 3.28 10.13

With YelloOrange Aerosol, we offer a special cleaner and label remover made from orange terpenes that can be used to effortlessly remove adhesive residues. Its well-dosed composition is gentle on painted and powder-coated surfaces.

YelloJack 3.29

YelloJack removes adhesive and sealant residues as well as oily, greasy and coarse dirt. Its optimal cleaning properties make this isopropanol cleaner the perfect all-around cleaning agent for plates and prints.

YelloFrog 3.34

YelloFrog is ideally suited for pre-cleaning vehicles as the first work step of a partial or full film application.

YelloFluid SurfaceCleaner 3.33

YelloFluid surface cleaner removes dirt particles and streaks from car bodies and PVC tarpaulins.

EasyClean Set

This set contains everything you need to remove adhesive films: The powerful YelloOrange cleaner in a handy 350 ml aerosol bottle, one of the useful YelloBlade Orange squegees and a tearproof YelloFleecePro cleaning cloth.

NanoEx 3.27

The pH-neutral cleaning agent dissolves up to 98% of all commercial sealants, so stickers and films can adhere optimally to vehicle bodies again.

EasyPump 1.27

Pressure pump sprayer. The special seals of this pump sprayer withstand most alcohol cleaners and its spray pattern is adapted to the challenges of all kinds of windscreen bonding.

EQUIPMENT

Whether car, boat, wall, window or building - your Sign Making Tools should always be there where you need them. We've met this challenge and developed the perfect Tool Bag System for the Sign Making industry.

YelloGear All-in Set

In this box you will find all components from our YelloGear series.

YelloGear BaseSet

These two sets are a good starting base for a variety of configurations. The 9-piece set differ only in the method of wearing. While the „Sash-Set" can be worn around the torso with a velcro sash, wear the „Belt-Set" around the hips with the velcro belt included.

YelloGear LineSet

With these two sets you keep your tools even closer! The standard equipment of the two sets includes MagPatch, Quiver, BigPouch, TripleMini, TriplePouch as well as either the YelloGear Belt or alternatively the YelloGear Sash.

YelloGear RobinBoes Set

Wrap professional Robin was instrumental in the development of the overall concept and he introduces his personal combination. The YelloGear set „Robin Boes" consists of the single elements Sash, Quiver, BigPouch, Triple Mini, Triple Pouch and YelloGear Base.

YelloGear Base

This base plate in the size 30 x 26 cm is made of sturdy sewn industrial high-performance textile and is provided on the outside across its entire surface with the proven loop fabric. On the back there is a 40 mm hook-and-loop strap that attaches the base to YelloGear Sash, YelloGear Belt or WallBracket.

YelloGear Belt

It is simply placed around the hips without straps and hooked thus remaining flexible with the ability to rotate at any angle. The top-side fly-on application allows you to pad and secure all YelloGear modules. It's just fun to upgrade and work with this system. The belt is 120 cm long and 7.5 cm wide.

YelloGear Sash

Infinitely adjustable shoulder strap with full velcro applications.This belt serves either for the direct placement of individual tools or as a carrying system for the base plate „YelloGear Base". Of course suitable for right- and left-handers.The sash offers high wearing comfort, fatigue-free working and keeps your tools always within reach.

YelloGear ToolBox

A qualitative and stable toolbox for all of our tools.

YelloGear PocketBlack

YelloGear PocketBlack and YelloGear PocketClear are lockable tool bags for holding multiple squeegees, cell phones, rangefinders, multiple cutters or pens and much more.

YelloGear PocketClear

YelloGear PocketBlack and YelloGear PocketClear are lockable tool bags for holding multiple squeegees, cell phones, rangefinders, multiple cutters or pens and much more.

YelloGear Quiver

Funnel-shaped hard shell for small, sharp tools like Knifes, Cutter and More.

YelloGear BigPouch

Even larger objects like screw packs or multiple squeegees at once can be attached thanks to the large velcro bag BigPouch.

YelloGear SmallPouch

The SmallPouch is - as the name implies - a small single bag with sturdy hardshell back and an elastic bag in the dimensions 70 mm (width) and 80 mm (depth). The fabric can be stretched up to 40 mm.

YelloGear TriplePouch

The TriplePouch is a single bag with a sturdy hardshell back measuring 95 mm (width) and 175 mm (length). It has three sewn-out individual slots for knives, tweezers, bubble poppers, pens and more. The slots are suitable for holding round tools and pin-like objects up to 17 mm in diameter.

YelloGear MagPatch

Four strong magnets hold metal handles firmly in place. Thanks to the velcro application, the MagPatch, like the other modules, can be placed and used anywhere on the straps. The effective area is approx. 60 x 60 mm.

YelloGear TripleMini

A sturdily stitched flex plate with three stretch tape holders for cutters, knives, pens, tweezers and other small tools. 85 x 65 mm small, it fits on any of our modules to the YelloStrap Pro.

YelloGear TapeHolder

The TapeHolder is a sturdy steel handle, riveted to a mounting plate with velcro application. All types of retaining clips, such as measuring tapes, handsets and more.

YelloGear SteelPatch

This module of the YelloGear Tool Pouch System allows you to park your wrap magnets where they are perfectly accessible, our SteelPatches are recommended! A sturdy steel disc of 50 x 50 mm encased in industrial textile.

YelloGear Clipper

With this Clipper, all modules of the YelloGear Tool Pouch System Family can also be fastened individually to your pants or belt. So you can use all modules completely independent of the YelloGear Belt or YelloGear Sash.

YelloStrap Pro

The „Pro“ is an extension of our bestseller YelloStrap and comes with 9 strong magnets. So you can park even more tools on your wrist.

YelloCase Blade Set

Just try all the SpareBlades that Yellotools has to offer from our YelloCase Blade Set with the YelloCut Master.

YelloCase Z-WrapSet

Our great friend and incredible Wrapmaster Zigrid Tijunelis with Signmakertools Canada showed us his favourite little Toolbox for Carwrap Applications and insoired us to this Casebox.

YelloCase 6

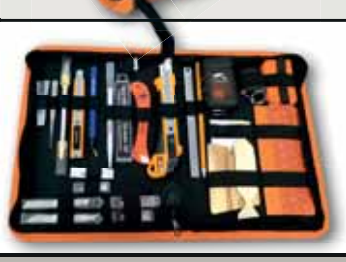
Our new, practical synthetic leather bags with embossed logo for safe storage of your favorite tools. Six flexible strap tabs hold cutters, wrap sticks, tweezers and much more.

YelloCase 20

Our new, practical synthetic leather bags with embossed logo for safe storage of your favorite tools. 20 flexible strap tabs hold cutters, wrap sticks, tweezers and much more.

YelloCase empty

In here everything‘s organized and keeping it like this is now very easy.



YelloCase 2.0 complete

In this set we have tried to put together a small selection of tools for a perfect start. Whether for measuring, cutting, squeegeeing or deburring signs, hopefully there is something for everyone that will make your heart beat faster and make your everyday work easier.

YelloCase Tweezer Set

Be it for precise weeding of film plots or for applying car wrapping films on wing edges and tapered vehicle parts - the YelloCase Tweezer Set 6 provides wrapping professionals and signmakers with the perfect tools for tricky tasks.

SignToolBox

A high-quality and stable tool box for all of our tools with great new features such as a new design, a metal plate to attach our magnets, a steel clip for our tape measure, a removable cover with a slot for carrying and also a shoulder strap.

YelloBelt

10 pockets, highclass quality bag with included belt which length you can adjust.

YelloBelt ProWrap Orange 3.17

Belt-pocket specially made for vehicle wrappers in orange, pink and black. Great features: rivet-free surface, heavy-duty nylon fabric, 8 different pockets, completely closable with velcro, and more.

YelloBelt ProWrap Pink 3.18

Belt-pocket specially made for vehicle wrappers in orange, pink and black. Great features: rivet-free surface, heavy-duty nylon fabric, 8 different pockets, completely closable with velcro, and more.

YelloBelt ProWrap Black 3.19

Belt-pocket specially made for vehicle wrappers in orange, pink and black. Great features: rivet-free surface, heavy-duty nylon fabric, 8 different pockets, completely closable with velcro, and more.

CarWrap Set

14-pieces Car Wrapping Set.

YelloBabe Set Pink

14-pieces Car Wrapping Set in pink.

YelloSnap Box

The retro-style YelloSnap Box is made of lightweight, anodized aluminum and offers a whopping 2 liters of volume - enough space for wrapping tools and accessories!

YelloPEG System

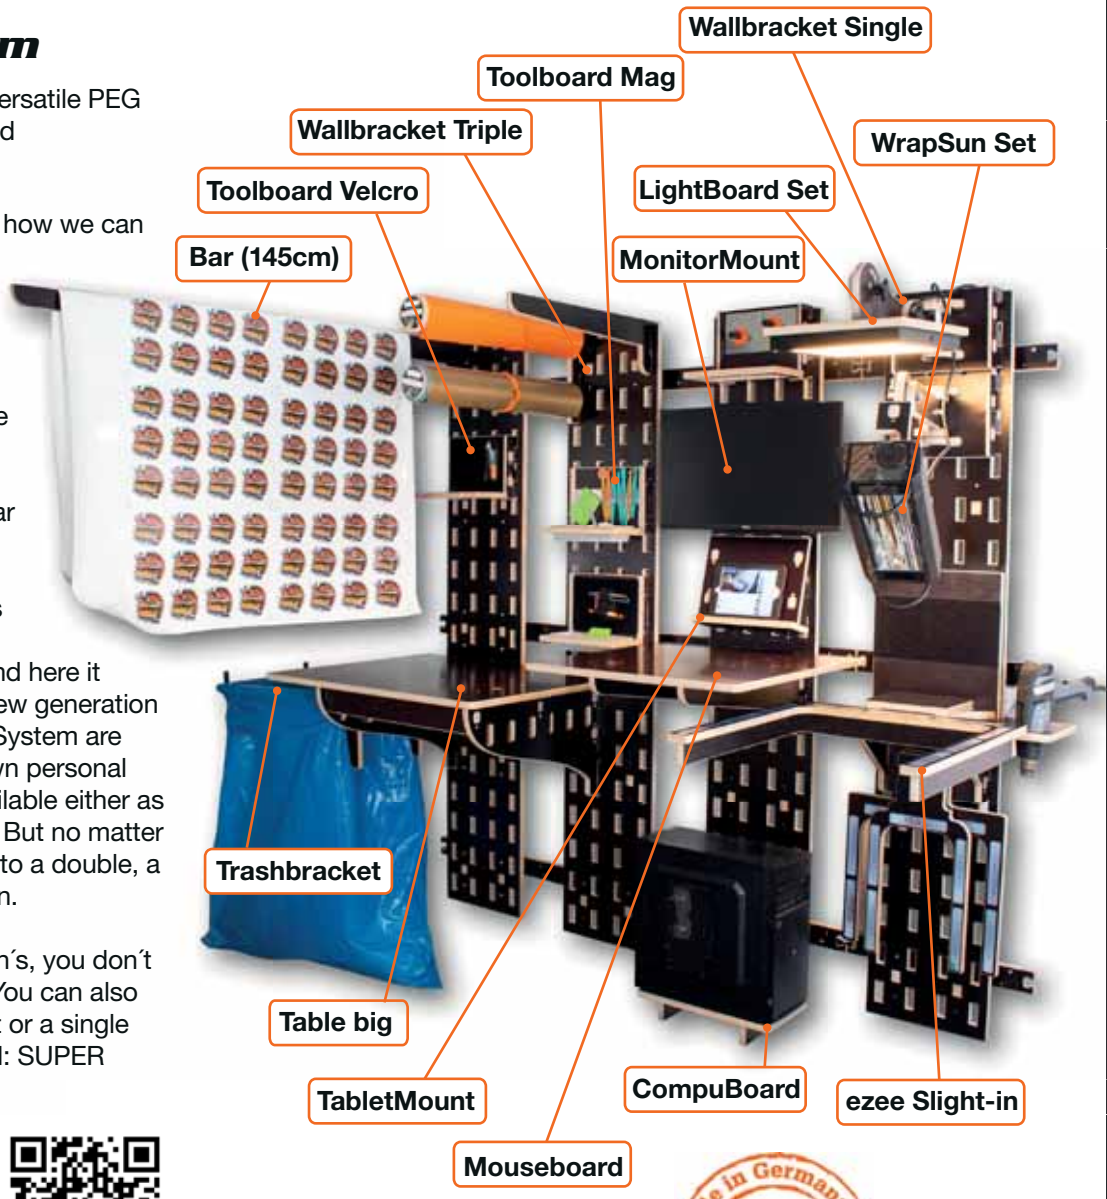
Probably the most flexible and versatile PEG Wall System for Carwrappers and Signmakers EVER.

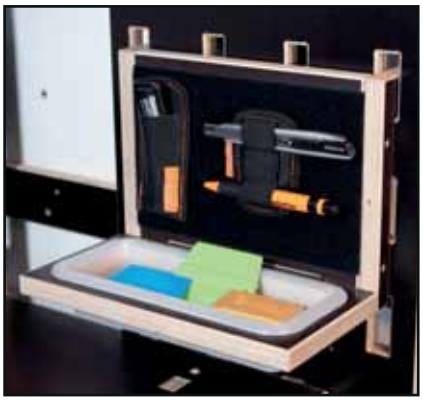
It all started with the question of how we can fix a disassembled Door-handle, Mirrorcap or Sharkfin antenna to wrap it as easy as possible without giving stress to the vinyl at the wrong areas. Well…after a few beers someone said “Why do we try to fix the object and not the vinyl like we do at the WRAP-U-EZEE?” A star was born!

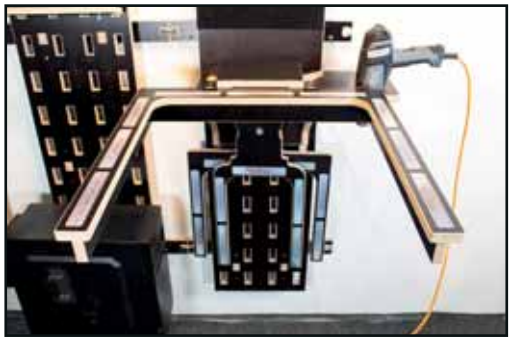
While we thought about all kinds of clamps or brackets, that PEG System grew more and more. And here it is! Ladies and gentlemen: The new generation of WRAP. Since all items in this System are individual, you can build your own personal “WrapWall”. The Boards are available either as a single unit or as a triple board. But no matter what, you can extend the single to a double, a triple to a quadripartite and so on.

To use the Wrap-U-ezee Slight-in´s, you don´t have to buy one of the Boards. You can also go with an optional Benchbraket or a single Wallmount Bracket. Like we said: SUPER FLEXIBLE.

Check this out in our online shop.



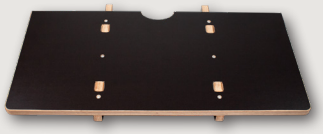




CompuBoard

Ezee Slide-In

LightBoard



MouseBoard

TabletMount

Store Twin

WrapSun Set

ToolBoard Mag

EasyCord 2.10

Tool holder - A system that always holds your tool in the right place therfore no more painful searching for anything!

TaperClip

This great new gadget allows you to fasten all kinds of 3”-cored tape rolls right on your belt or waistband. Another hand is back in the game. TAPERCLIP works great with masking tapes and of course with your KNIFELESS Tape as well

LeanRuler Brackets

Holders for SafetyRuler cutting rulers. The brackets are simply screwed to the tabletop from below or directly to the wall.

YelloBench Basic

The worktable is dismountable and comes with brackets for your SafetyRuler all around the bench.

YelloBench to-go

The worktable to go.

CAR WRAPPING

Thanks to our innovative products, Yellotools is known like hot cakes in the car wrapping scene: Professional film applicators from all over the world approach us and tell us what they really need to perform a perfect wrap job. That's why we are always developing new car wrapping products to make your job as easy as possible!

CableFlyer

The cleverly designed wooden construction can simply be pushed in front of the wheel and fixed in place. The cable runs along the guide and cannot get stuck.

HeatCage S

Most vinyl applicators simply clamp the heat gun briefly between their legs so it's ready to hand for the next warm-up cycle. The still-hot unit can cause injury during this process - which is why we offer the Heat-Cage S heat gun cage.

WrapGun II

Professional heat gun for installing car wrapping and plotter films.

WrapGun II Set

The perfect complete set for carwrapping professionals with 5% purchasing advantage compared to the single purchase!

WrapGun Case

Storage box for the WrapGun II heat gun.

WrapGun Mag

The practical magnet holder for your heat gun.

TemperScan

Slip-on temperature scanner for the WrapGun II heat gun.

YelloTemper ProWrap

The YelloTemper ProWrap offers the possibility to use the temperature sensor in continuous operation. This function is retrofitted by us, as the temperature should be checked permanently, especially during film wrapping work.

YelloShuttle II

Put an end to the annoying 2-hand technique when tempering car wrapping films: heating and measuring during installation is now possible with just one tool and one hand!

GladiBelt

Practical hot air gun holder. The sturdy holder made of genuine leather and metal is an absolute must-have for every car wrapping professional.

WrapJet Easy-Set

With this hand-held gas burner for vehicle wrapping and signmaking applications, tasks like tempering adhesive films or finishing sign edges can be carried out without using an electric heat gun - completely free of annoying cables and warm-up phases.

WrapJet Easy SpareTank

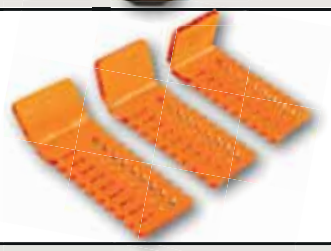
Gas replacement cartridge for the WrapJet Easy.

WrapJet HeatGun Head

Hot air attachment for the WrapJet Easy-Set.

WrapJet HeatGun Set

Our practical Carwrapping Set consists of the WrapJet Easy-Set and the WrapJet HeatGun Head.



BumperRacer Set 1.21

Template for marking excess film.

LowRider

Rollable workshop stool for optimal wrapping of sills, bumpers and wheel arches.

LowRider Extension

With the LowRider Extensions, the seat height of the workshop stool can be adjusted so that even tall people can enjoy the unique seating comfort of the LowRider.

WrapWalk

The WrapWalk system consists of modular wooden structures that can be stacked next to each other, in front of each other or on top of each other as desired. This allows car wrappers to find the right platform length and height to create their perfect work conditions.

WrapStep

Due to the special skid design, the WrapStep can even be pushed into the vehicle with the door open. Rubberized edges prevent damage to the body and vehicle parts. Available as set.

WrapStep Walk

The WrapStep Walk connects two WrapSteps to form a stable walking platform.

LaserLion

Cross line laser as alignment aid for all kinds of film applications.

LaserLion Tray Single / Double

This mount allows the cross line laser to be precisely aligned for perfect application of graphics and lettering.

WrapTower

Customize your tool tower individually by selecting the various tool modules to suit your jobs and preferences based on your required tools.

Example image

LaserLion Set

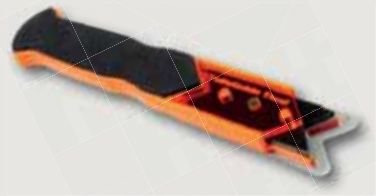
Problems with aligning car wrapping graphics or the wall tattoo for the living room? Here is the solution: Our LaserLion series with green or red cross lasers as alignment aids for perfect graphics and lettering on vehicles, walls, tarpaulins and much more! These cross line lasers can be used to record reference lines for plotted vinyls and move them in parallel, as well as to search for reference points on the vehicle and mark them for later application.

LaserLions are available with either a red or green laser. The difference lies in the visibility of the laser line: The green one is sometimes twice as visible as the red one .

The easy to move LaserLion Tray slides are available either to hold a single laser or as a double head mount.

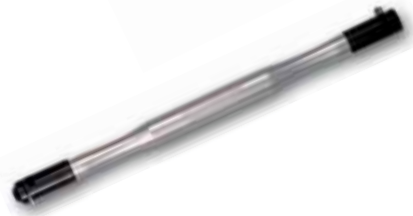
SasserCut Pro / SasserCut Pro Set 8.2 8.3

Roller-guided splitting knife for vinyl cutting on car doors, fuel caps and the like. It has a standard immersion depth of 5.3 mm. With the replacement rollers you can easily change the depth to 4.0 or 6.5 mm.



YelloGuide Flexi 8.1

The ingenious 16-in-1 sign making multi-tool for internal and external distance cuts. With the YelloGuide Flexi you can cut along an inner or outer contour with a distance of 3, 4 or 5 mm.



MaliCut 2.15

Undercut knife for vehicle films. With the MaliCut you can create invisible undercuts between the driver's cab and the loading area in deep gaps in the bodywork, for example on pickups, so that no streaks of the original paint come through.

YelloLip Cutter 7.12

A BodyGuardKnife cutting shoe as an insert for our popular YelloTwin. Here you can insert the knife into the YelloTwin Base. One side will have any of the squeegee shores you prefer and the other will have the Cutter!

DoorHandle Remover 1.2

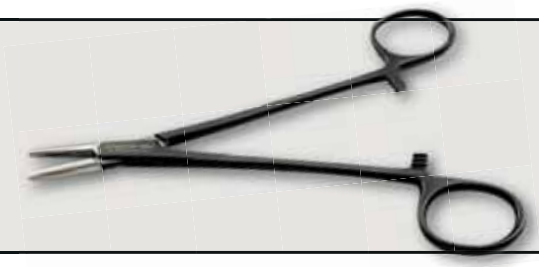
Hook tool for removing door handles.

GrabHandle Remover 1.1

Tool for removing headliners and many other attachments.

YelloShear Orbit 1.26 2.43

YelloShear Orbit - professional, curved shear for car wrappers!



WrapCrib Slim 2.41

Lockable mini pliers with geared beak point.

WrapCrib Disc 2.42

Lockable mini pliers with geared plate point.

WrapDefender 1.12

The WrapDefender is the first safety knife for vehicle flippers with which you can easily cut curves, for example to trim the foil with paper in the wheel house. The easy to change, super-sharp and stainless steel scalpel blade is superior to any cutter blade.

WrapDefender 45R / 45L 1.13 1.14

Perfect for making cuts in hard-to-reach areas where the handle would be in the way. With a left or right bend.

WrapDefender Grip 1.11

Perfect for working with wrapping gloves. The handle makes it easier to grip the tool and it is easier to guide it.

WrapDefender Loony 1.10

Perfect for cuts behind components / areas in front of it, such as radiators, furniture, window frames, car parts.

WrapDefender Mini 1.15

Shorter version of the original Wrap Defender. Ergonomic handle and perfect for filigree cuts.

WrapDefender SuperSet 1.4

This Set includes all WrapDefender version, a replacement head and spare blades.

WrapStraight Cut Black 2.46 2.47 2.48

The car wrapping spatula for clean and precise distance cuts.

Available in three versions: 1 mm, 2 mm and 3 mm.

GeckoPatch from 2.1

You want to make non-magnetic, even surfaces like windows, fiberglass assemblies, aluminum hoods or plastic doors „magnetic“ - just press our GeckoPatch on and continue to use your magnets as usual.

GeckoPatch Power from 2.5

The Gecko Patch Power offers extreme adhesive force on non-magnetic surfaces such as glass panes. 3 times the adhesive force thanks to 1 mm thick sheet metal

SpeedMag HD 3.7

Powerful Magnet - Allows transfer work unassisted.

YelloCase Z-WrapSet

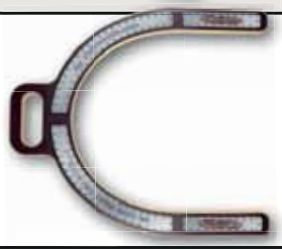
Our great friend and incredible Wrapmaster Zigrid Tijunelis with Signmakertools Canada showed us his favourite little Toolbox for Carwrap Applications and insoired us to this Casebox.

YelloCase Tweezer Set

Be it for precise weeding of film plots or for applying car wrapping films on wing edges and tapered vehicle parts - the YelloCase Tweezer Set 6 provides wrapping professionals and signmakers with the perfect tools for tricky tasks.

YelloCase Blade Set

Just try all the SpareBlades that Yellotools has to offer from our YelloCase Blade Set with the YelloCut Master.



Wrap-U-ezee 2.11

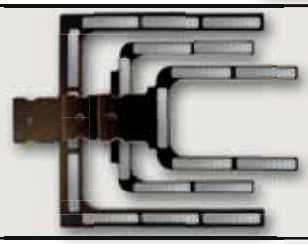
Foiling aid for protruding vehicle parts. The special feature here is that the films can be evenly pre-stretched and the danger of overstretching in certain areas is extremely reduced.

Wrap-U-ezee Flat 2.14 2.16

Foiling aid for GPS antenna on the car. With the help of the new Wrap-U-ezee Flat, many add-on parts can now be wrapped directly on the vehicle without disassembly.

Wrap-U-ezee Bumper

With our new Wrap-U-ezee Bumper you can wrap bumper corners or very large chassis parts.



Wrap-U-ezee Slide-In

For wrapping dismantled vehicle parts To use the Wrap-U-ezee Slight-in´s, you don´t have to buy one of the Boards. You can also go with an optional Benchbraket or a single Wallmount Bracket.

WrapBar-ezee 2.18

Foil stretching aid. Thanks to the acrylic glass applications, you can perfectly pretension and cover your films on fenders, protruding edges or more complex parts.

APE DuoGreen 1.24

Squeegee for PPF. The two-layer construction gives stability and flexibility at the same time. Different edge grindings of 30, 45 and 90 degrees allow different pressures to be applied. The DuoGreen is the harder version.

APE DuoRed 1.25

Squeegee for PPF. The two-layer construction gives stability and flexibility at the same time. Different edge grindings of 30, 45 and 90 degrees allow different pressures to be applied. The DuoRed is the softer version.

PPF Sandwich 1.22 1.23

This squeegee, which is actually unusually thin for PPF or tinted film applications, is nevertheless stable enough to exert optimum pressure on the squeegee edge. For large areas it guarantees fatigue-free work.

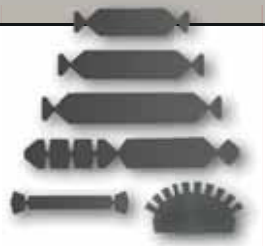
Thanks to its pointed edge ergonomics, it enables optimal working out of the adhesive up to the edges.

Z-Sticks 1.18 1.19

Zigfrid Tijunelis suggested another product idea: He noticed that our Ape Duo and PPF Sandwich squeegees work great on hoods, bumpers and doors, but are too big for detail work. So he suggested we should offer a mini version of these multi-layer squeegees, which can be used to work on air vents, headlight frames, door edges and much more.

FoxyFluid 1.20 3.22

Application fluid for window tinting films. With FoxyFluid, tinting films can be pre-stretched and adjusted on vehicle windows without having to mask off the surrounding areas!



APE T-Buffer

from 6.12

Due to the extremely gliding surface, the film is not „displaced“ during squeegee operation. So you can simply squeegee away the wrinkles that occur when the adhesive is pressed out. The flexible buffer contains an extra thick foam backing in the adhesive layer.

APE ApplePotion

1.28

Perfectly coordinated bonding aid for paint protection film (PPF).

APE FoamPotion

1.32

Perfectly coordinated bonding aid for paint protection film (PPF).

The foam „stands“ longer than any normal liquid and it creates a „distance“ between the film/adhesive and the substrate.

EasyPump Foam

1.31

Pressure pump container with special head. The foaming degree is adjustable on three levels - SNOW FOAM (solid foam), MOUSSE FOAM (medium foam) and HYDRO FOAM (liquid foam).

EasyPump

1.27

Pressure pump sprayer. The special seals of this pump sprayer withstand most alcohol cleaners and its spray pattern is adapted to the challenges of all kinds of windscreen bonding.

APE MagCarpet

2.17

3.5

Flexible magnetic carpet with eight strong magnets. It hugs curves, has a high adhesive force and can no longer „roll away“ under the vehicle.

Ape Set-PPF I

Large paint protection film tool set for CarWrapper. We have put together a huge selection with our best tools for PPF stonechip protection films.

Ape Set-PPF II

With the Ape Set-PPF II you have the best conditions to pre-clean the vehicles perfectly. The set includes the ApeFoamPotion foam with the EasyPump Foam and the ApeApple Potion with the corresponding pump spray bottle EasyPump.

Ape Set-PPF III

XXL-Paint protection film set. For all those who start completely NEW, we offer the Ape Set-PPF III consisting of Ape Set-PPF I and Ape Set-PPF II. Herewith you are on the safe side to own the ultimate Starter Set and can start right away.

YelloQuickStick 2.53

Check the surface tension of car paints and signs very fast.

CarWrap Set

Everything you need for a professional Vehicle Foiling - 14-pieces Car Wrapping Set.

YelloBabe Set Pink

With the YelloBabe Set Pink, all pink lovers get a nice 16-piece tool set that covers all typical work areas such as cutting, storing and attaching foils.

WrapTweezer AutoLock 2.39

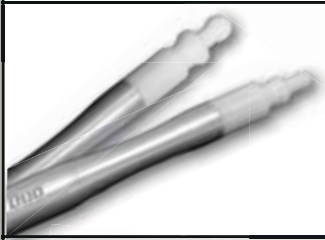
a Tweezer with a geared spade-shaped point which helps to grap the vinyl safely for stretching. The AutoLock variant can also be locked to keep your hands as free as possible.

WrapTweezer Disc 2.38

A tweezer with a geared plate-shaped oint which helps to grap the vinyl safely for stretching. The AutoLock variant can also be locked to keep your hands as free as possible.

WrapTweezer Spade 2.40

A tweezer with a geared plate-shaped oint which helps to grap the vinyl safely for stretching.



Lucky FlipperPen Duo 2.60

This ingenious Car Wrapping Stick allows you to apply vinyls on the door rabbet and edges in general.

WrapSlipCut Clipper 9.8

Knife guidance and cutting spacer in one Car Wrapping Tool.

YelloTape Start

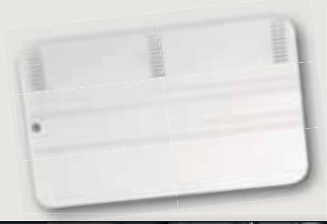
The little helper to open the „Knifeless Tapes“.

WrapSlipCut Mini 9.11

Cutting aid for clean parallel cuts.

WrapFinger

The Car Wrapping Glove for one single finger!



WrapSlipCut MagicMaster 9.9

Teflon squeegee with parallel slots. Knife guidance for clean vinyl cutting.

SnugPad

Sitting and Kneeling Mat for Signmakers in three variants.

WrapSun Power

Infrared heater for heating up the vinyl.

StrikerSet

27-piece tool set for the disassembly of car interior lining, trim or door handles.

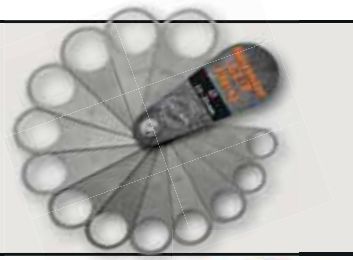
MagTool Tray

Magnetic tool tray with strong adhesive magnets for use on vehicles.

WrapStick Station / Mag

Squeegee pen holder for wall mounting or as a magnetic version.

There are two magnets on the WrapStick station so that you can park the holder on the vehicle at any time.



SensorCut Flexi 2.9 9.15

Practical cutting template for parking sensors.

WrapBend-it 2.52

Shaped wire for copying vehicle contours.

YelloGloves [1.33]

High quality nylon gloves for car wrapping & sign making.

GloveMaxx ProWrap [1.29] [1.30]

These specially designed gloves have a four times higher gliding performance than conventional Car Wrapping gloves due to their „wet feeling effect“.

YelloOpen [1.3]

The variable holding system for doors and flaps. Available in three versions.

Fineline Tape [from 1.5]

High-quality Crepe and Cutting Tape in different versions.

LacyTip [from 2.54]

With the LacyTips you can easily lift rubber lips or apply vinyl on hard-to-reach areas.

RubberLift [2.49]

The Car Wrapping Tool #1 for lifting rubber gaskets.

WrapStick Tupp [2.23]

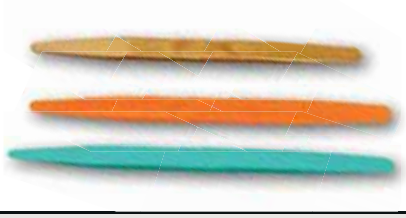
We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Sloan [2.32] [2.33] [2.34]

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Hook [2.31]

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.



WrapStick Beavertail 2.35 2.36 2.37

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Betty 2.26 2.28

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Carson 2.20 2.22 2.24

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick HangLoose 2.30

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Flex 2.25 2.27 2.29

We currently offer 7 different versions with a total of 13 different tool tips and 5 degrees of hardness. All WrapSticks are equipped with an integrated powerful holding magnet to park them safely and within easy reach on the vehicle, on the GeckoPatch or the YelloGear Patch.

WrapStick Set

The WrapStick Set contains:

- WrapStick Betty Gold/Green
- WrapStick Carson Gold/Teflon/Peekaboo
- WrapStick Flex Gold/Orange/Teflon
- WrapStick HangLoose
- WrapStick Hook
- WrapStick Sloan Gold/Teflon/Peekaboo
- WrapStick Tupp Gold/Teflon
- WrapStick WingPoly Betty/ Carson/Sloan

WrapStick Set Deluxe

The WrapStick Set contains:

- WrapStick Beavertail Gold/Orange/Teflon
- WrapStick Betty Gold/Green
- WrapStick Carson Gold/Teflon/Peekaboo
- WrapStick Flex Gold/Orange/Teflon
- WrapStick HangLoose
- WrapStick Hook
- WrapStick Sloan Gold/Teflon/Peekaboo
- WrapStick Tupp Gold/Teflon
- WrapStick WingPoly Betty/Carson/Sloan
- YelloCut Slim lightweight cutting knife
- SpareBlades 9 mm 59°
- YelloCase 20 tool pouch

THE LEAN DEAL

Unbelievable! A textbook that reads like a novel.

Michael Althoff succeeds in writing in such a remarkable way that on every page he seems to look over the shoulder of the reader and enter into a dialogue with him beyond the lines read.

For the reader, it is a very exciting and practical experience as the author's magical working world opens up.

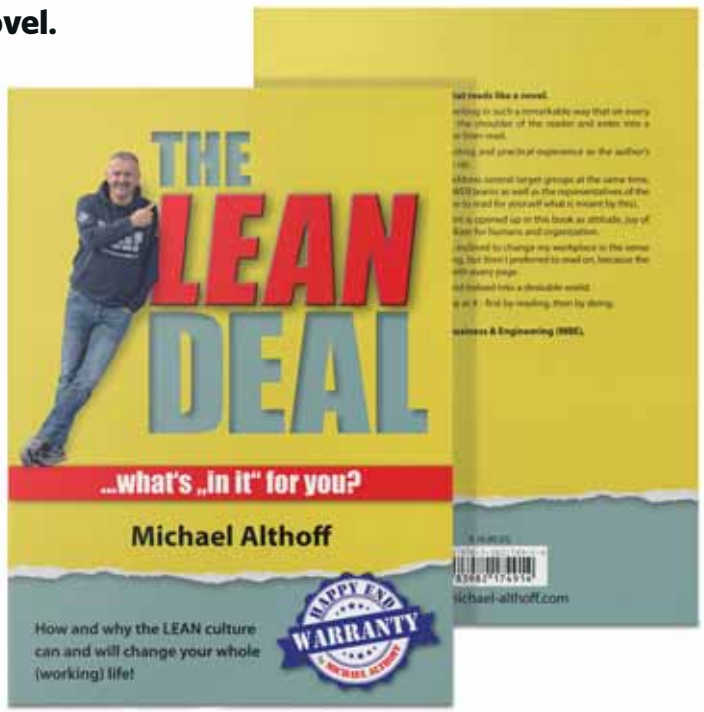
Michael Althoff manages to address several target groups at the same time, the representatives of the POWER teams as well as the representatives of the NAVIGATIONS teams (you have to read for yourself what is meant by this).

The world of lean management is opened up in this book as attitude, joy of life and work and growth fertilizer for humans and organization.

While I was still reading, I was inclined to change my workplace in the sense of lean thinking and lean acting, but then I preferred to read on, because the book makes you want more with every page.

With lean it goes on and on and indeed into a desirable world.

You just have to start and keep at it - first by reading, then by doing.



Are you interested in Lean and want to learn more about The Lean Deal? Then simply scan the QR-Code and go directly to the book in our online shop.

“Do they really manufacture those tools by themselves?”

Yes, we do. More than 75% of our products are produced by ourselves in our small but nice manufacture, located in the beautiful “Windecker Ländchen”. During our active time as sign-makers we discovered some funny & innovative improvements. Those affected our daily work life so much positively, that we started to produce them in series. As shown in the pictures below we develop, design & sell all of our products and we produce most of them with our own machines and technologies. Our injection molding machines, CNC-miling machines, CNC-editing, water jet, our master joinery, printers and punches are used with know-how and passion to make your work life easier.

DEMOBOARD NAVIGATOR

This is how it works:

The printed catalog basically works on its own as an overview about our Product range. But instead of waisting paper with showing boring pictures of a lookalike application, it leads you to the certain website with all detailed information, pictures and videos about the product. A litte number in the column of the item in the catalog indicates the location of the real product at a Tradeshow or the Showroom of our Distributors at the Tooldisplays.

And it also works vice-versa:

While at a Show or a Showroom you will find that number at the Display right next to the Item. **Scan the QR Code** at the Tooldisplay OR look for the number in the Catalog and get all the Information about the product you need.
